With 2,200+ LEDs per pad Prism Light Pad is the most powerful on the market

Prism Light Pad is the only pad available that you can lie on.

User-operated, with one-button automation.

Portable, easy to use, and adaptable.

Prism Light Pad offers full body wellness and healing at the touch of a button

Q&A

Healthcare providers, aestheticians, massage therapists, and users worldwide are healing and rejuvenating themselves and their guests with Prism Light Pad's whole-body red light therapy solution. It's a natural wellness 30-minute service that is safe and effective.

For example; if your clinic is open 5 days a week from 9am-5pm, you have the capacity of adding 80 light pod sessions per week or 4,160 sessions per year, that's a revenue capacity of \$124,800 of potential incremental annual revenues at \$30 per session.

At 100% utilization: \$124,800 divided by cost of \$12,995 = annual ROI 960%

At 75% utilization: \$93,600 divided by cost of \$12,995 = annual ROI 720%

At 50% utilization: \$62,400 divided by cost of \$12,995 = annual ROI 480%

At 25% utilization: \$31,200 divided by cost of \$12,995 = annual ROI 240%

Financing is available.

- **Is Prism Light Pad safe and effective?**
- Yes. Prism Light Pad uses non-invasive, non-fluorescent, non-UV rays, and non-infrared heat-based red LED technology.
- **How does it work?**
- Red Light Therapy delivers deep photo-cellular or mitochondrial healing. NASA first used red light therapy on astronauts in the 1970s. Prism Light Pad has pioneered & perfected whole-body photobiomodulation systems for wellness centers worldwide.
- **How much training and administration is required?**
- There is no training required. The Prism Light Pad is automated and 100% unattended. There is one optimized use-case setting. Users lay comfortably for 30-minute sessions. The automatic timer turns Prism Light Pad off at the end of each session and the staff or user wipes it down with a disinfectant wipe.
