

PRISM LIGHT PAD

The Prism Light Pad is the industry's most powerful and portable whole-body red light therapy solution. It's an industrial-grade full-body pad with more than 2,200 660nm red and 850nm near-infrared LEDs. Designed, assembled, shipped and supported from Denver Colorado, USA.

Home users can now experience whole-body red light therapy while they are watching their favorite 30-minute show with the automated Prism Light Pad.

Experience whole body red light therapy from the Prism Light Pad at the comfort of your home or take it along when you are traveling. We have incorporated our innovative one-button optimized setting into the light pad that is widely revered by users of our award-winning Prism Light Pod.

Why leave home and be without the rejuvenating effects of whole-body red light therapy?

Now you can take it on the road!

Key features of the Prism Light Pad:

- Largest whole body red light pad in the industry at 72”L x 36”W or 183cm L x 91cm W
- Durable to lay on or cover while resting in a firm flat surface such as lounge without handles, massage table or on a firm mattress
- Includes more than 2,200 660nm red and 850nm near-infrared industrial LEDs per pad
- 4,400 LEDs when two pads are used at the same time for 360 degrees of red light therapy
- Delivers 50 mw/cm² of irradiance for deep mitochondrial wellness with LEDs closest to the skin
- Includes optimized and automated 30-minute sessions per side
- Uses Prism's unique “One-Button” operation and takes less than 5 minutes to set-up the pad
- Includes a durable clear industrial PVC cover that's easy to disinfect with a spray or wipes
- Rolls-up into a convenient carrying case for minimum storage required
- Includes a sturdy carrying case for maximum portability & weighs approximately 6 lbs. Approx. 2.7 kilograms.
- Carry it onto an airplane and store it in the overhead compartment (as permitted by each airline)
- Includes a one-year return-to-factory limited warranty

What does a Prism Light Pad treatment feel like?

- The patient will lie on a treatment table or bed and the pad(s) are placed under and/or on top of the body. Push the on button to begin the 30-minute automated session. When the system is on, the patient will feel a slight warming sensation, like a warm hug. They should take this time to relax and enjoy the mitochondrial level healing. Once the 30-minute session automatically times out, transfer the pad to the other side. Achieve 360 degrees of full-body red light therapy in a 30-minute session when you purchase two pads.

How often should I receive treatments and how long will the results last?

- Results will vary from patient to patient, depending on the use case(s) being treated. Patients should feel rejuvenated after a single 30-minute session. Chronic pain and neuropathy conditions will take numerous sessions to see optimal results. If a patient maintains a healthy lifestyle while implementing red light therapy 3-5 times a week, the benefits will be long term.

Is the Prism Light Pad safe?

- Yes. Prism Light Pad treatments are safe and non-invasive. The light emitted by the Prism Light Pad does not generate excessive heat nor UV light waves. The light is very bright and while it is safe to look at, some patients may prefer to use protective eyewear. The Prism Light Pad is free of both EMF/ELF frequencies.
