

REST-KIT5 ADJUSTABLE RESTRAINT KIT

RESTRAINT KIT CONSISTING OF HT2 HARNESS AND RLA ADJUSTABLE RESTRAINT LANYARD WITH 2 X CAB1 CARABINERS.

The Adjustable Restraint Kit 5 consists of our HT2 two point harness, RLA Adjustable restraint lanyard (1.2m-2m) and 2 x CAB1 carabiners. These components come in a functionally designed drawstring bag offering a ready to go Fall Restraint Kit. Very popular for cherry pickers and access platforms, the length of the lanyard can easily and quickly be adjusted to the optimal length for the wearer. The HT2 harness has 2 attachment points (Rear and Front) as well as two designated attachment loops for unused lanyards to ensure they aren't connected to harness webbing incorrectly. The RLA 14mm Polyester rope lanyard is adjustable between 1.2 metres minimum to 2 metres maximum. To be used as restraint lanyard with the 2 x CAB1 carabiners
