

Note: At present, Tuya can only support 2.4G WiFi signal. Therefore, before connecting the phone to the chiller, please confirm that the WiFi used by your phone is in the 2.4G frequency band. If it is in the 5G frequency band, it will not be able to connect to the chiller.

**CAUTIONS:**

- Do not turn the chiller upside down.
- Do not use without filter element installed
- Make sure there is more 50cm free space around the chiller

Ensure that the water level inside the bath is always above the lowest marked level before activating the chiller. This is crucial to allow the pump to self-prime properly and prevent the introduction of air into the system. The presence of air can interfere with the machine's operation and potentially reduce its lifespan.

Working Temperature: 3 C~40 C

Included Accessories

Plastic wrench

Filter Element

Water Pipe

Quick Conector

Rubber Seal

Warning Label

Warning Label

User Manual

## How to install?

### Remarks:

Replace the filter element in time when it swells or becomes dirty, so as not to affect the operation of the chiller.

**Do not operate the chiller without the filter element!**

Water Volume & Cooling Time (23°C to 5°C) For reference only	Above data based on testing in closed insulated barrel, 30°C room temperature							
Main Features	Excellent design with low noise				Overloading protection			
	Built-in self-priming circulating Pump				With Anti-freeze System			
	Water and electricity separating system.				Overheating Protection			
	Leakage Protection System for Electricity				Max. Cooling Capacity in Specified Spaces			
	Built-in OZONE disinfection device, and external water filter				Suitable For Indoor and Outdoor Cooling and Heating			
	WiFi Connection Remote Control by IOS & Android System				Excellent value, priced to be as affordable as possible			
	Easy to install including hoses with quick connectors				Manufactured with the high quality materials and components that can work under 24h*7			
	Automatic on/off and Constant Temperature System							

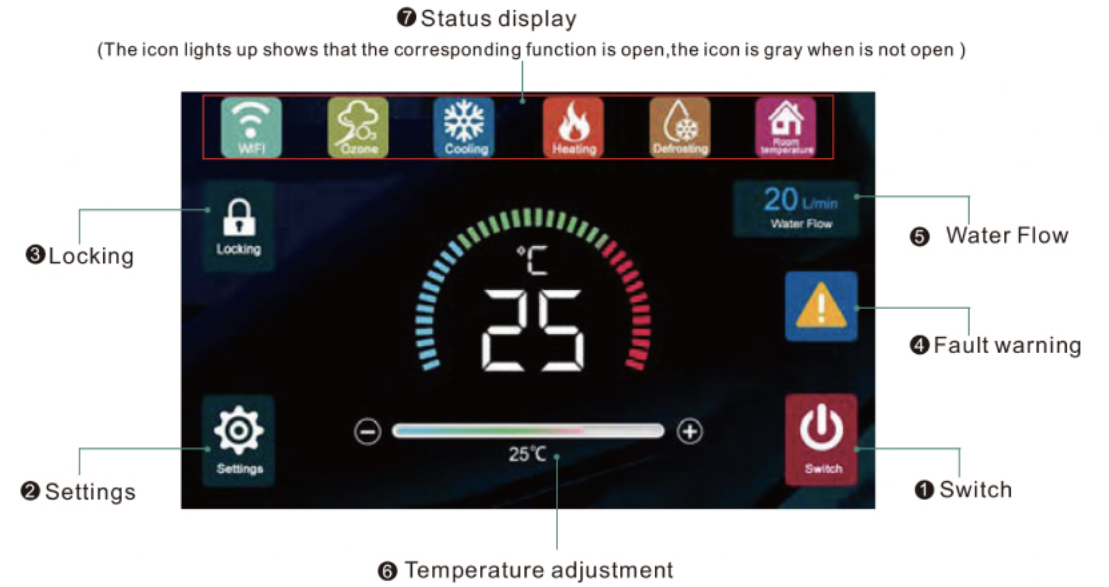

# Touch Screen Control

## USER MANUAL:

### Touch screen introduction

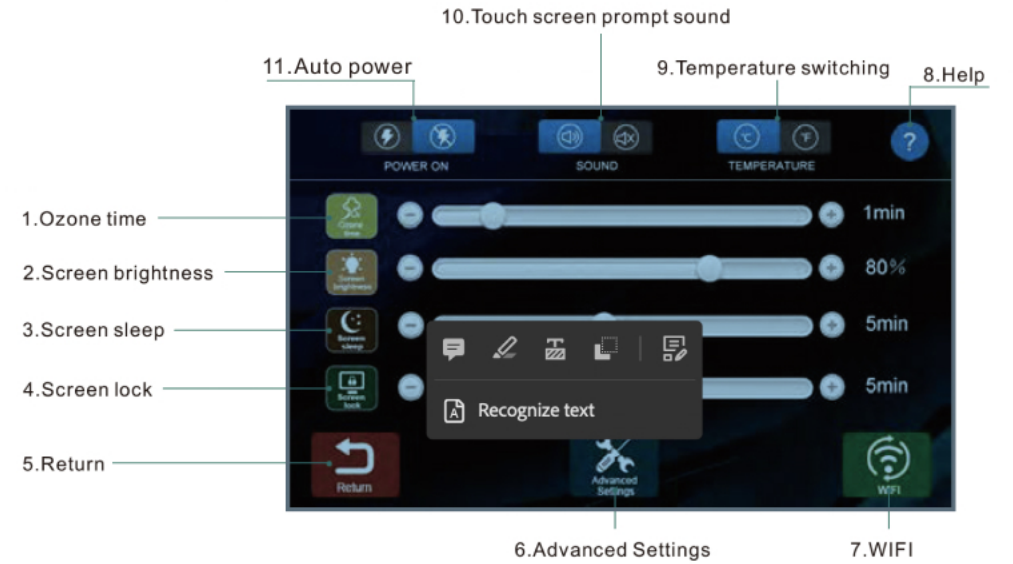

1. Turn on/off 
2. Click  Settings button to enter the second screen
3. Press  3-5 seconds to lock/unlock
4. When the machine fails, the fault icon blinks 
5. The water flow rate is displayed when the machine is operating normally
6. Temperature adjustment 
7. Status display

## Touch screen introduction

1. Adjust the ozone time min 0 minutes, max 1 minute 
2. Adjust the screen brightness to a minimum of 10% and a maximum of 100% 
3. Adjust the screen sleep time to 0 minutes and the max to 5 minutes 
4. Adjust the min screen lock time to 0 minutes and the max to 5 minutes
5. Click return button to enter the first interface 
6. Advanced Settings 
7. Press for several second to turn on/off 
8. Click the help Icon to scan the QR code for technical support
9. Temperature switching(°C/°F) 
10. Adjust the touch screen prompt sound, which can be muted 
11. Auto power on 

# ICE BATH CHILLER

## Smart App Control

### WIFI Disposition

1. Turn on the chiller.
2. Click the settings key.
3. Press WIFI key for 3-5 seconds until the WIFI blinks.
4. Open the Tuya APP on your phone.
5. Select add device.
6. Turn on your phone's WIFI connection and enter password.
7. Succeeded in adding a link, Enter the APP control screen.

# Wi-Fi Control Mobile Application

## App interface introduction

1. Turn on/off (Turn on/off the chiller)
2. Locking (Machine screen lock/unlock)
3. Temperature switching (Units switch °C / °F)
4. Water Flow
5. Set Time
6. Touch screen prompt sound (ON/OFF)
7. Auto Power
8. Water Switch1
9. Water Switch2
10. Ozone time setting (Ozone time can be adjusted from 0-5 minutes)
11. Temperature adjustment (The temperature can be adjusted from 3-42 Celsius)
12. Current Temperature

Error Code	Alarm	Reason	Solve Solutions	Machine Status
IN	NO	Bad panel connection	Re-plug both ends of the cable	Can not work
HH	YES	The water temperature is higher than the upper limit temperature	If there is a difference between the low water temperature and the displayed water temperature, the water temperature sensor is faulty.	Can not work
FL	YES	No water flow or too little water flow	1. No water flow: the water pump is broken or stuck, and the waterway is blocked 2. Small water flow: There may be a tube folded in the waterway, the water flow is not smooth, or the waterway is not cleaned for too long, and the scale is blocked, flush it with an air gun. 3. The water flow protection switch is broken: replace the water flow switch.	Press and hold the mode button + setting button for 5 seconds to force the alarm to be dismissed, and the machine will work normally.
Ch1	YES	Bad Sensor (Green)	Replace the NTC1 temperature sensor, restart the machine after replacement.	Can not work
HEA	NO	Heating Failure	The machine can only do the cooling function	Normal Work
ICE	NO	Water temperature below freezing point	Turn off the machine, pour hot water into the bucket and heat it for 20 minutes, then turn it on again. If the antifreeze solution is used, you can press the MODE + SET button at the same time to force the alarm and the machine will resume normal operation.	Press key2+key3 at the same time for 3 seconds to forcibly cancel the alarm, and the machine returns to normal work.
PA	NO	Sensor failure (Red)	Replacing the NTC3 temperature sensor	Normal Work
AA	NO	Temperature Sensor Failure	Replacing the NTC4 temperature sensor	Normal Work

## Fault Code Analysis and Solution

Alarm description: When the effect is affected but it can work normally, an alarm will sound. If it does not affect the work, it will not alarm.

**Precautions:**

1. Avoid obstructing the room's fan outlet, as it can diminish the effectiveness of heating and cooling while also wasting energy.
2. Keep equipment cleanliness a priority. Regularly inspect and maintain both the equipment and its filtering devices.
3. Never touch the fan while the equipment is running to prevent potential finger injuries.
4. Be vigilant about matching the product's rated voltage with your home's power supply voltage.
5. Exercise caution during equipment operation – refrain from touching switches or any electrical components with your hands.
