

# How Does it Work?

Zukyun D.I.Y Lash Extensions are specially designed to adhere to the underside of your natural lashes.

Our proprietary Korea-made adhesive formulas promise strong hold for up to 1 week.

## Brief How-To Steps:

**Step 1:** Curl natural lashes with your usual eye curler.

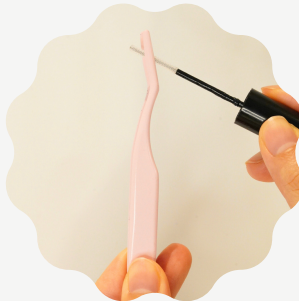

**Step 2:** Apply Lash Bond to **UNDERSIDE** of natural lashes.

**Step 3:** Also apply Lash Bond to each lash cluster. Only 3-4 clusters are needed per eye.

**Step 4:** Apply the lash cluster to underside of natural lashes. Repeat this step until both eyes are fully lashed.

**Step 5:** Apply Lash Sealant to **INSIDE** plates of Applicator...

**Step 6:** ...before **SQUEEZING** at **BASE** of lashes for a seamless look!

## How to Remove

Remove anytime, anywhere -  
in less than 1 minute!

Apply our Lash Remover with its wand on the top and underside of your lashes. Coat them fully.

Allow the Remover to sit for around 40 seconds. Use the Remover wand or your fingers to slide the lash clusters down.

There should be ZERO resistance and no tugging. If that's not the case, simply apply more Remover and give it a couple more seconds.

Rinse and wipe your Remover wand before inserting it back in the bottle.

If you've got some Lash Bond remaining on your natural lashes, grab your favourite eye make-up remover (ideally oil-based) & cotton rounds to wipe the remains off.
