

Salice 155 Degree Hinge for Face Frame Overlay Cabinets

HOW TO CHOOSE THE CORRECT MOUNTING PLATE

STEP 1	Measure your bore distance. This is the distance from the edge of the door to edge of the large round hole drilled into the back of the door.
STEP 2	<p>Measure your door overlay. The overlay is how much the door overlaps the cabinet. The following directions will tell you how to measure it. For further clarification, there is a link on the product page with more detailed instructions.</p> <ol style="list-style-type: none"> 1 Close the cabinet door. 2 Apply a piece of tape vertically to the hinged side of the cabinet so the edge of the tape is flush against the hinged edge of the door. This marks how much the door overlaps the frame. 3 Open the door until you see the edge of the tape between the door and cabinet. Measure from the inside edge of the tape to the opening of the cabinet door. This is your overlay dimension.
STEP 3	<p>Once you know the bore distance and overlay of your door, you can use the chart below to determine which mounting plate you need. If you find that the chart gives you two mounting plate options, choose the plate where your overlay is closest to the middle of the range shown. This will give you the largest range of adjustment.</p> <p>Example: if your overlay is 15mm and your bore distance is 3mm, then you have the option of choosing either the 4mm plate or the 1mm plate. The best choice would be the 1mm plate because 15mm is in the middle of 12.5mm and 18.5mm.</p>

APPOXIMATE CONVERSION CHART	
3mm	1/8"
4mm	5/32"
5mm	3/16"
5.5mm	7/32"
6mm	1/4"
7mm	9/32"
8mm	5/16"
9mm	11/32"
9.5mm	3/8"
10mm	13/32"
11mm	7/16"
