## Blum Straight Arm Hinge for Frameless Overlay Cabinets HOW TO CHOOSE THE CORRECT MOUNTING PLATE

sтер <b>1</b>		<b>Measure your bore distance.</b> This is the distance from the edge of the door to the edge of the large round hole drilled into the back of the door.							APPOXIMATE CONVERSION CHART	
 STEP									1/8"	3mm
2		Measure your door overlay. The overlay is how much the door overlaps the cabinet. The							5/32"	4mm
	<b></b>	following directions will tell you how to measure it. For further clarification, there is a link on the product page with more detailed instructions.							3/16"	5mm
								7/32"	5.5mm	
		1	Close t	the cabinet door.					1/4"	6mm
		Apply a piece of tape vertically to the hinged side of the cabinet so the edge of the tape							9/32"	7mm
		2	is flush with the hinged edge of the door. This marks how much the door overlaps the frame.						5/16"	8mm
									11/32"	9mm
				ne door until you see the edge of the tape between the door and cabinet. Measure					3/8"	9.5mm
		3		from the inside edge of the tape to the opening of the cabinet door. This is your overlay dimension.						10mm
			unnent						7/16"	11mm
	STEP	Once you know the bore distance and overlay of your door, you can use the chart below to determine which mounting plate you need. If you find that the chart gives you two mounting plate options, choose the plate where your overlay is closest to the middle of the range shown. This will give you the largest range of adjustment.							15/32"	12mm
	3								1/2"	13mm
									17/32"	13.5mm
									9/16"	14mm
		Example: if your overlay is 15mm and your bore distance is 5mm, then you have the option of choosing either the 3mm plate or the 0mm plate. While either will work, the best choice							19/32"	15mm
				Id be the Omm plate because it provides slightly more room for adjustment.						16mm
									11/16"	17mm
BORE DISTANCE									23/32"	18mm
