## Salice Straight Arm Hinge for Face Frame Overlay Cabinets - 40mm Cup HOW TO CHOOSE THE CORRECT MOUNTING PLATE

STEP

STEP
2
Measure your bore distance. This is the distance from the edge of the door to the edge of the large round hole drilled into the back of the door.

Measure your door overlay. The overlay is how much the door overlaps the cabinet. The following directions will tell you how to measure it. For further clarification, there is a link on the product page with more detailed instructions.

1 Close the cabinet door.
Apply a piece of tape vertically to the hinged side of the cabinet so the edge of the tape

2 is flush against the hinged edge of the door. This marks how much the door overlaps the frame.

Open the door until you see the edge of the tape between the door and cabinet. Measure from the inside edge of the tape to the opening of the cabinet door. This is your overlay dimension.

STEP
3

Once you know the bore distance and overlay of your door, you can use the chart on page two of this document to determine which mounting plate you need.
