MEGA PRO GRADE
GLUE TRAPS

MINI PRO GRADE
GLUE TRAPS

Description

Catcher Labs. Mega and Mini Pro Grade Glue Traps are made with industrial grade extra sticky glue. They are pre-baited with a multi - purpose sweet scented formula that attracts a variety of pests. The sticky glue is strong enough to catch and kill crawling and hopping insects such as crickets, centipedes, cockroaches, spiders, scorpions and even mice. The adhesive strength grade is just enough to catch them but not enough to cause problems for you and/or your pets.

When to use

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Mega & Mini Pro Grade Glue Traps

Easy to Setup and Use : No additional baiting is required, you only have to remove the cover of the adhesive glue board. If you prefer, you can add extra attractants such as cereal, grains or sweet syrup on the traps sticky surface. The glue boards can be deployed immediately at full performance.

Setup Tips and Recommendations: After removing the cover of the glue boards, place the traps along bottoms of walls and corners in areas where you have noticed pests before. Pests usually like to congregate in warm, moist and dark areas within your house, such as in your garage, kitchen, underneath your fridge and near heaters or fireplaces.

Non - Toxic & Insecticide - Free: Made with industrial grade super sticky adhesive that is 100% non - toxic and safe to use throughout your home.

Cost - Effective: These traps are the same grade as any professional pest control company will deploy, therefore you get the same results at a fraction of the price of having to call - in your local pest control company.

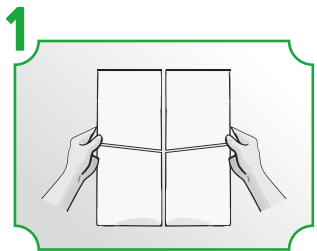

Our Multi Purpose Pro Grade Glue Traps come in 2 different box options. Firstly, as a Mega sized trap that contains 8 glue boards. Secondly, as a Mini sized trap that contains 48 glue boards.

FAQ

1. Are These Traps Safe for Pets and Children?

All Catcher Labs products are natural and safe for the whole family when used as directed.

2. How Long Does Traps Last?

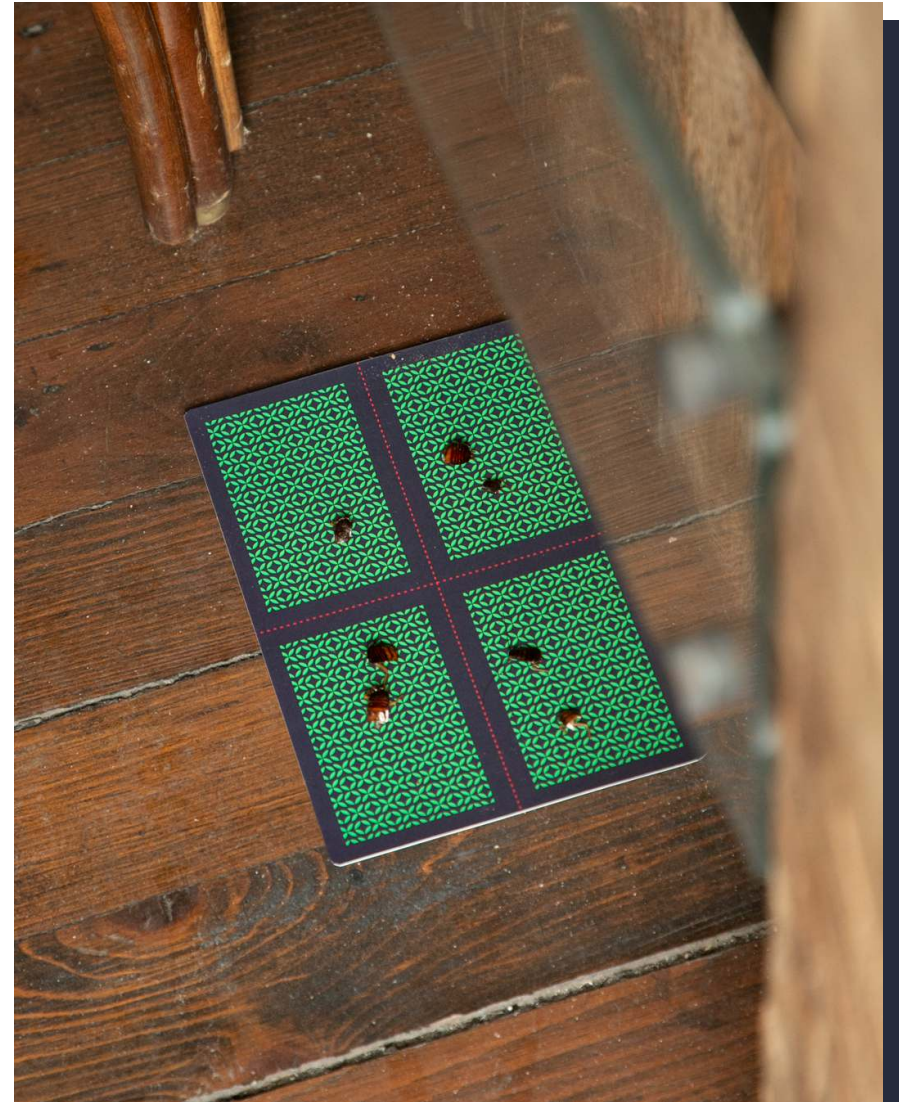

An unopened box of traps can last up to 12 Months or more under right storage conditions. Opened box/traps can last up to 3 months or when fully occupied.

3. What To Do If Traps Don't Catch Any Bugs?

In some unique cases, traps may not catch any bugs although you see them crawling around. It could be that traps are misplaced. If you place the traps in spots that are difficult even for bugs to reach, it will eventually not catch any. It could also be the case that you have a bug infestation that is out of target bugs of these traps.

4. What Are the Target Bugs?

Cockroaches, spiders, centipedes, crickets, scorpions, snakes, mice and silverfish.
