BAHNER

Innovation and fashion for larger women

The new BAHNER »Plus Line« – support tights designed to get ideal comfort and style for plus-size figures

Consumers with larger sizes make up an average of 23% of the total consumers in Europe, led by the UK with 47% of the female population above size 14, followed by Germany at 29%. The plus-size sector is expected to grow yearly at a rate of 5% globally. The new BAHNER »Plus Line« hosiery is designed especially for these women.

Ask for the new BAHNER »Plus Line« and make your customers feel that their needs have been understood.

Perfect fit and comfortable style

BAHNER »Plus Line« hosiery uses the special LYCRA® Xceptionelle construction for the panty. A combination of an engineered garment construction and a LYCRA® fibre technology that is designed to deliver ideal comfort and style for the plus-size figure, with a very light and transparent body. A non conventional waistband prevents uncomfortable dig in at the waist or thigh.

Leg portions (front and back) are knitted separately to form asymmetrical tubes and to achieve maximum width. A special support area in the back and a normal cotton gusset guarantee perfect look – for happier and more relaxed women.

Plus size your business

Take part in a growing market and make profit with BAHNER »Plus Line« hosiery! We start immediately and offer the new support tights »Plus Line« in four different sizes and three stylish colours.
