

Dome Crystal Diffuser with Light

TO USE: Put crystal stones into glass vessel, and add 3 to 5 drops oil onto the stones. The stones will absorb the oil and fragrance will diffuser into the air. Allow 24-36 hours for fragrance to diffuser. Evaporation may vary in different environments. Continue to add 3 to 5 drops every few days or as needed.

The wooden base is a rechargeable LED light and has on/off soft touch button on front. Ensure LED light base is plugged in and charged before use.

Put glass vessel with crystals on wooden base and turn on. Use with any type of fragrance oil and aromatherapy, or leave fragrance free as a mini night light.

LED light will shut off when out of charge. Recharge with USB cable for 2-3 hours.

CAUTION: Keep out of reach of children. Do not place near a flame or heat source. Use in a properly ventilated area. Do not diffuse in the presence of children or animals. Aerate the diffusion area regularly. Do not pour water into glass vessel when stones inside.
