HOW TO CLICKIT ON YOUR DOG

Place logo in the center of your dog's chest. Straps should fit tight with three fingers laid flat under the buckles while your dog is standing up. Straps may appear loose while dog is lying down.

To use as a walking harness, clip both metal rings (at the neck) onto your dog's leash.

Attach hook and loop tab to the strap.

Take time to acclimate your pet to its new harness before a trip.

HOW TO CLICKIT IN THE REAR SEAT

To connect Clickit Sport to your vehicle, insert seat belt through both loops located on the back of the harness and then buckle into the car's seat belt buckle. Avoid locking the seat belt.

Pets should ride in the back seat. Never leave a pet unattended.

Your dog should be able to sit up and lie down comfortably.
