

A MODERN ENERGY DRINK

ABOUT WAIZLI

Either you are skiing, at the golf course, or at the gym. Maybe you have kids running around your feet, or the yoga session has you smiling on the floor. They all makes your body *crave that little extra boost*. And the boost is **Waizli**.

Waizli is a product you choose for your body, with a clean conscience. Not only does it grant you that energy boost; it also helps your body recover after a strain, either from an intense workout or an active everyday life.

Compared to its caffeinated competitors, Waizli sets itself apart with it's nutritional content. Niacin, panthotenic acid, magnesium and selenium are all approved vitamins and minerals added to beverages not containing caffeine.

NUTRITIONAL CONTENT:

Per 100 ml and per can (330 ml)

Nutritional Facts	100 ml % DV*	330 ml % DV*
Energy	13 kJ / 3 kcal	44 kJ / 10 kcal
Fat	<0,01 g	<0,01 g
- Saturated	0 g	0 g
Carbohydrates	0,3 g	0,9 g
- Sugars	<0,1 g	0,2 g
Protein	<0,01 g	<0,02 g

WHAT DOES WAIZLI CONTAIN?

Ginseng

Traditional Chinese medicine have used ginseng over centuries to increase physical stamina and vitality. NHI (Norsk Helseinformatikk) recommends usage of ginseng to *improve the immune defence, cognitive functions and mental well being*.

Ashwagandha

Traditionally used as an adaptogen, and research point towards *reduction of physical and mental stress*. Ashwagandha aids in reducing the cortisol level, which is positive when reducing stress.

Panthotenic Acid

Also known as Vitamin B5, which first and foremost aids the body to *release energy from the food we eat*. This is accomplished by helping the metabolism of carbohydrates, proteins and fat, which in turn makes the body *maintain and repair cells* in all kinds of tissue.

Niacin

Vitamin B3 is an important part of the energy conversion in the body, and aids to *keep the skin healthy*, while also having a positive effect on both the nervous system and the digestion system.

Vitamin B6

Pyridoxine is essential for *protein metabolism, formation of red blood cells and regulation of the nervous system*. Also aids in the fluid balance of the body.

Vitamin B12

Cobalamin is essential for *energy metabolism, formation of red blood cells, and DNA synthesis*.

Magnesium

Magnesium is *necessary for nerve signal transmission*, and is a vital component in *energy production*, while also *aiding to regulate blood sugar and pressure*.

Selenium

The most powerful antioxidant in nature, *protecting the cells* against harm from free radicals. Selenium is also favourable for the *thyroid function, the immune system and the reproductive system*.
