

Resin Stone

Our resin stone products are manufactured with a white inner core and an outer clear gel coat finish. All resin stone products have a 5-year warranty on the finish, on condition that these care instructions have been correctly followed.

Installation

Our Stone products are NOT intended for outdoor installation, this will void Warranty.

BEFORE INSTALLATION:

Check goods thoroughly. Installation of received goods that are damaged, warped or faulty will void warranty. We strongly recommend that you use a qualified installer as incorrect installation will not be covered under warranty. Please refer to instructions specific to your product, found inside the packaging.

Please note: Shrinkage lines, air holes, casting marks and other blemishes on the underside of the product (where they cannot be seen once installed) do not adversely affect performance and should not be regarded as defects.

Cleaning & Care

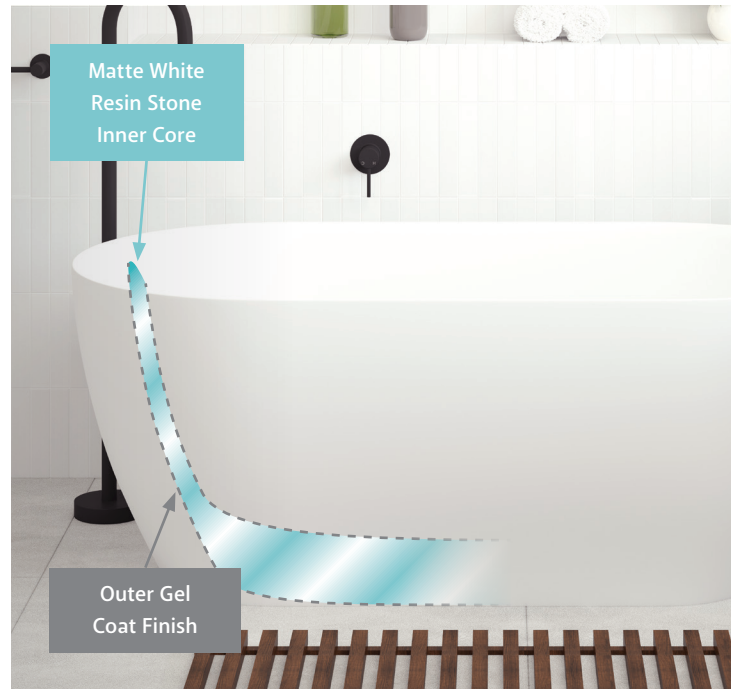

IMPORTANT: Avoid direct sunlight. Prolonged exposure to sunlight can cause the finish to discolour and crack. When this is not possible, reduce the amount of light by the use of window shades, drapes or blinds.

We recommend weekly cleaning with mild soapy water or a non-abrasive bathroom cleaner.

- Never use harsh detergents, citrus-based cleaners or abrasive cleaners, as these will scratch the surface. Use of unsuitable cleaners may damage the surface and will not be covered by warranty.
- Never use metal scourers on this product.
- Where your bath remains dry, a soft cloth can be used to remove surface dust.
- Use of wax-based furniture cream should be avoided as these can result in a build-up of deposits which could detract from the appearance.
- Do not use undue pressure and wipe in one direction only.
- Keep hair dye away from this product to avoid staining.

Repair

Chips or scratches more than 2 mm thick will expose the resin and can only be repaired by a professional acrylic or solid surface bath repairer. Do not attempt to use sand paper on this product.

Bath & Basin Stone Materials

Fienza uses two stone materials for selected baths and basins: Cast Stone Solid Surface and Resin Stone.

Our cast stone solid surface products are the most premium stone material on the market, using the very best technologies to ensure durability and longevity. The unique formula of our resin stone provides a cost-effective alternative giving similar quality for less.

We provide a 25-year warranty on structural integrity and a 5-year warranty on finish across all Cast Stone Solid Surface and Resin Stone products.
