2. Fasten the four lengths of yarn together by tying a knot on one end.

3. Insert one length of **B** through each straw.
4. With the long length of **A**, begin to weave across the straws, alternating the yarn over and under each straw.

5. When you reach the edge of the straws, being working in the opposite direction. Continue weaving back and forth.

6. After you have completed a few rows of weaving, push the yarn up toward the top of the straws.
7. **Optional:** If you find that the straws are not sturdy, attach a binder clip to the top of the straws to stabilize them.
