SHOP KIT

Sun & Rainbow Plate Weaving

If it's raining outside, stay indoors and make this crafty wall hanging while you wait for the sun to shine again. This fun project is perfect for developing small motor skills and learning your colors.
DIRECTIONS

1. Cut paper plate in half.

2. Use hole punch to make 7 holes evenly spaced along cut side of plate, ⅜" [10 mm] away from the edge.

3. Use sharp pin to poke 9 holes evenly spaced inside rim of plate.

4. Cut strands of **A** and **B** approx. 2 yds [1.8 m] long. Use tapestry needle to stitch lines between large holes and small holes, creating sun rays.

5. Continue until you've achieved the desired density. Knot yarns on wrong side to secure.

WOMEN'S CHOICE AWARD®
AMERICA'S MOST RECOMMENDED YARN BRAND
2015 - 2019

6. Use Inner Ray template to cut 7 inner rays from orange foam. Use Outer Ray template to cut 8 outer rays from yellow foam.

7. Arrange inner rays around bottom of plate and secure with tacky glue. Arrange outer rays on top of inner rays and secure with tacky glue. Let sit until glue is dry.

8. Cut 6 strands 24″ [61 cm] long from each color yarn. Working with each color separately, fold yarn in half.

9. Draw the fold through the large holes, from front to back. Draw ends of yarn through the fold and pull snug. Place a different color in each hole, as shown in photo.

Steam tassels so yarn hangs straight. Trim ends of tassels even.
