OUR SUPPLY CHAIN.

As individuals and as a community, we can all make a difference by insisting suppliers provide transparency of their supply chain.

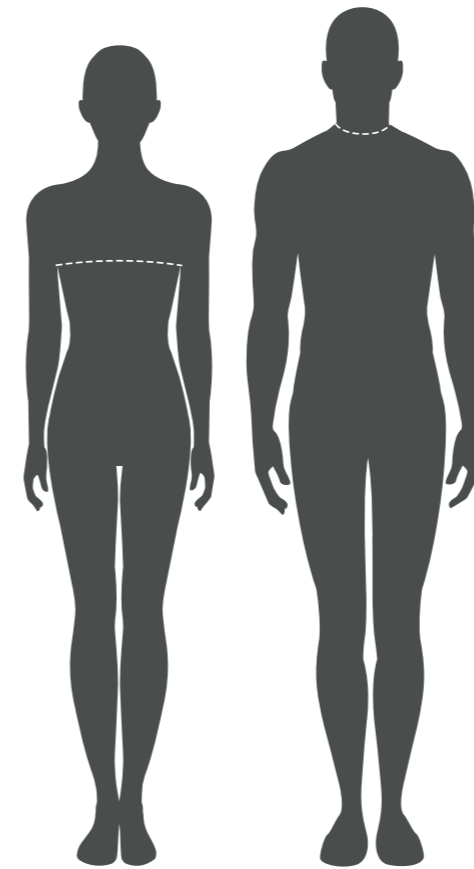

In 2012 we opened our own manufacturing company in Vietnam, where we now employ 250 staff, with intentions to expand. This ownership of our offshore manufacturing resource is a critical element in our strategic plan. It provides direct control over quality, lead time scheduling and manufacturing volumes. Corporate Reflection provides our customers with complete transparency of our manufacturing facility and confidence that we exceed both local and international labour standards.

We are fortunate to have such capable and motivated employees and we place the utmost importance on their health, safety and wellbeing in the workplace.
