

# GAS RELIEF OIL

**Gas Relief Oil.** It is as simple as it sounds! A blend of the highest quality essential oils in an olive oil base that relieves gas and cramping – naturally! This potent solution to gas and stomach pains is easy to use and effects rapid results.

As always, we bring you natural remedies in place of unnatural over-the-counter options. Gas Relief Oil is no different. It is gentle enough for infants and strong enough for adults.

To apply, massage a few drops on the soles of the feet or around the navel. Relief will not be long in coming.

The oil may be used together with Miracle Clay. The clay will absorb the gas and stop the spasms.

Colic is an uncomfortable experience for an infant, and can be difficult for the parents as well. It is generally caused by painful spasmodic contractions of the infant's digestive tract or by air

and gas trapped in the intestines. A smear of Gas Relief Oil will alleviate the symptoms and soothe both the baby and all those around.

It is highly beneficial to use a good probiotic, in addition. You may want to double the suggested dosage on the label. Colicky children are often extremely sensitive to their environment. Feeding time should, whenever possible, be a time of quiet and rest; peaceful music is a good idea. If the parent is tense, the infant will usually respond with tension. Not necessarily are all mothers of colicky babies stressed out, but if you find it difficult to retain your calm, Power Food and Miracle Clay may make a huge difference, giving you the energy you so badly need.

Whenever your baby shows signs of stomach discomfort, remember to apply some Gas Relief Oil so you could roll back to sleep!

## THESE ARE JUST A SAMPLING OF TRUE EXPERIENCES WITH GAS RELIEF OIL:

- > An 18-month old baby tried to ease her pain by laying on her stomach. She refused to get up even to allow her diaper to be changed. Two minutes after the Gas Relief Oil was applied, she was ready to move about freely – the pain was gone!
- > A woman bought a bottle of Gas Relief Oil to send to an acquaintance out of the country. That night, she awoke with terrible stomach and gas pains. With the oil already in her house, she knew just what to do. It worked fast and was a lifesaver.
- > The mother of a newborn did not know what to do with her 6-week-old who just would not stop crying. She smeared some Gas Relief Oil and the baby went from crying incessantly for six hours straight, to sleeping a calm five-hour stretch.
- > Another mother was desperate to help her 3-year-old son who was in agony because of a terrible stomachache. She massaged the Gas Relief Oil and was trying to decide what else she could do to alleviate his pain when she noticed him begin to jump around and play with the other children, his pain gone! Gas Relief Oil to the rescue again!
