Jennifer Janson

Alanna Cardenas

### MANUFACTURERS

Rework, Compel, Storlie, Haworth,  
Design Within Reach

## HIGHLIGHTS

- Space planning
- Finish selections
- Budget management

## THE SCOPE

When Braven approached us after doing an online search and finding Rework, we were excited to get started on setting them up for long-term success in their new office. Our client wanted a space with an upscale yet inviting aesthetic, and we utilized our inventory of refurbished furniture to complete the project successfully with a limited budget and tight timeline.

## THE PROCESS

We wanted to create a space that encouraged collaboration and creativity so we selected Compel Pivit Benching, which are the perfect compliment for open layouts. Haworth Tag chairs offered ergonomic agility while still maintaining a sense of style throughout this modern space. We tied everything together with lounge furniture by Le Corbusier to add an urban edge and a contemporary aesthetic. Selecting both new and pre-owned inventory enabled this project to come in within the aggressive timeline and under budget. We were able to complete everything within three weeks from the order date to install, making this project a huge success.

## Testimonial

"Rework exceeded our expectations for sourcing sustainable commercial products with vendors who serviced Union green office practices for our design project. Jennifer promptly scheduled an appointment to tour the showroom and warehouse. Alanna quickly jumped on board to mitigate solutions for small spaces, and creatively solved any additions to the overall project. As a result, the Braven Design project was successful and Braven loved the new office space!

JM Interior Stylings will highly recommend Rework for any future commercial office projects."
