General Description

TL4K1161 is a small form factor serial digital video (SDI) transmitter. Camera video input signals are equalized, processed and output over coaxial connectors. Dual Link 3G-SDI output is compliant to SMPTE ST425-3, 2si mapping, FHD output is compliant to SMPTE ST425-1 level A standards.

Camera control is accomplished by a transparent full duplex communication channel. Physical interface between camera and camera controller / PC is based on RS232 or 3.3V TTL level. TLCK-B-0200 cable kit is available as accessory.

Applications

- + 4K UHD and full HD integrated cameras based on Sony FCB-ER8550, FCB-ER8530, FCB-ER8300, FCB-ES8230 and FCB-EW9500H camera blocks
- + Industrial, medical, security, law enforcement, video production
