Rubio[®]
MONOCOAT
PROTECTS AND COLOURS YOUR WOOD IN ONE SINGLE LAYER

RUBIO[®] MONOCOAT PRE-AGING
GET THE LOOK OF A REACTIVE STAIN, WITHOUT THE DISADVANTAGES

A new floor with an old look. It is a floor trend that is currently very popular. In addition to actually smoking and fuming wood, there are many reactive products that will give the wood a smoked or aged look.

Rubio Monocoat Pre-Aging is a high-quality, **non-reactive** pretreatment, available in 10 standard shades. The colour spectrum ranges from a lighter to a darker smoked look, with colours that can be mixed with each other to the variant the customer wants. There is also a range of aged colours that can be mixed together. This results in a **deep colour with subtle accents**. The hard parts of the wood and the sapwood are also coloured to get the most natural aged look possible.

This non-reactive pretreatment is easy to apply on site **without any overlaps**.

The product is applicable to **virtually all wood types**, because the effect of the product is not dependent on the tannins content of the wood. This is unlike reactive stains, which can only be used on wood types containing tannins.

[TIP]
Do take into account that the base colour, the grain structure and the porosity of the wood will affect the end result. A wood type with red undertones, for example, will have a different effect than new, pale pinewood. That is why it is important to apply a sample first.

In combination with Rubio Monocoat Oil Plus 2C as final protection, you get a nearly unlimited spectrum of creative options, partially due to the transparency of this product. In other words, the aging effect is permanent.

Additional unique characteristics:

- › Non-reactive water-based pretreatment
- › Stable colour that is easy to reproduce
- › Excellent stain resistance after treatment with Rubio Monocoat oil
- › Deep colouring with subtle accents
- › Applicable to virtually all wood types
- › Neutral product
- › Does not affect the quality of the finishing coat
- › Minimal odour
- › Free of transport restrictions
- › Colours the hard parts of the wood and the sapwood
- › No overlaps

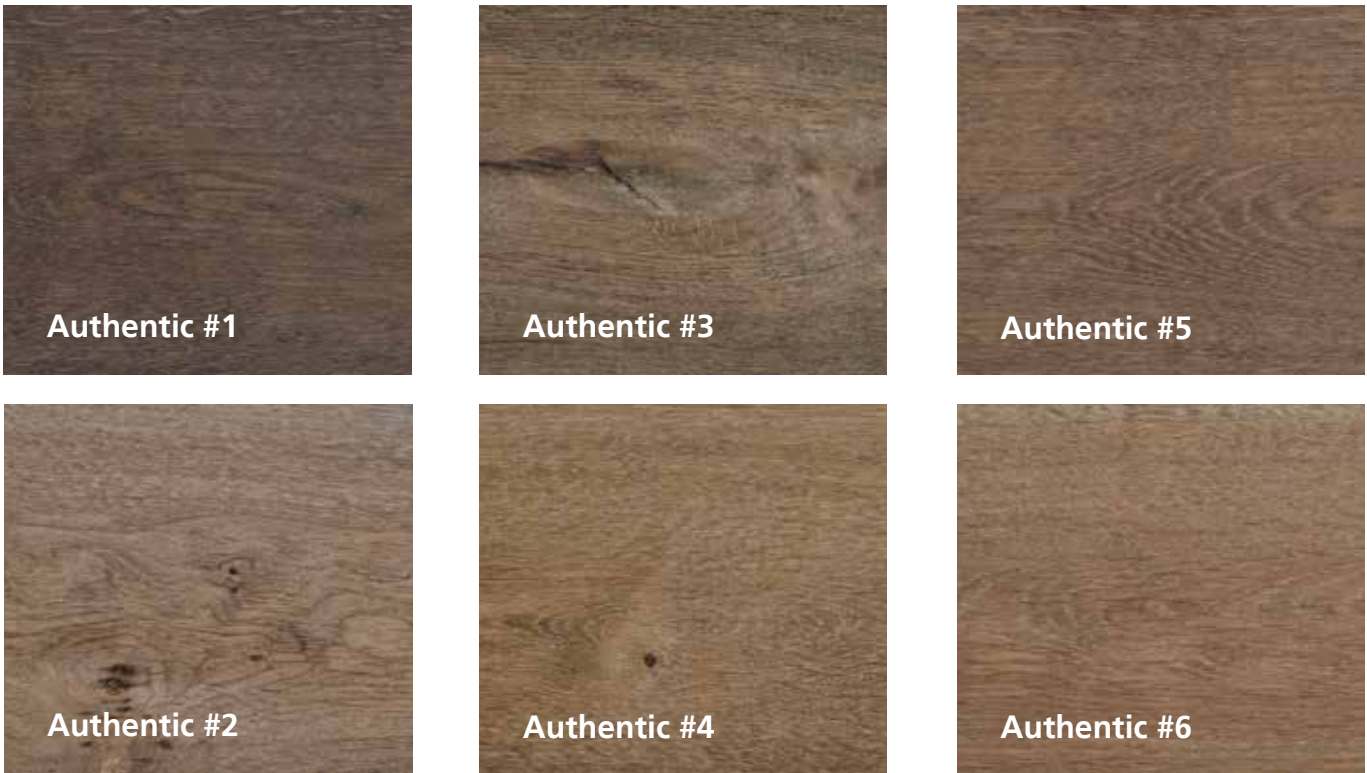

This product is a pretreatment and does not protect the wood. **It has to be combined with one of our Rubio Monocoat finishing products** for maximum protection.

Fumed look

Authentic Amonia look

The colours can be mixed to get the exact pre-aged tone the customer has in mind.

Smoked look

The colours can be mixed to get the exact pre-aged tone the customer has in mind.

Colours shown are on Oak.
The colours shown are for reference only and are not binding.
