Heritage Range

The Heritage range offers every possible choice of size, variation of steel multi column, a choice of 188 RAL colours and 30 special finishes

How to order:

- All prices and outputs are given per section in the tables listed
- Price per section includes wall brackets as standard, plugs, bushes and diverter. Alternative mounting options must be selected separately, these will include the air vent and appropriate number of wall ties.
- Please specify your finish at time of order
- 1. Work out the required output for your room; To find the output you require for each radiator first work out the heat output for your room. If you have a large room, divide this number by the total number of radiators you need in the room. e.g. a lounge 16' x 20' x 8' ceilings = a volume of 2560 x 6 = 15,360 BTUs. Two radiators would be required which = 7680 BTUs each. Your installer will also be able to help you decide this, if required. We also list the outputs in Watts.

2. Choose the number of Columns

Heritage radiators are available in a choice of five column depths; 2, 3, 4, 5 and 6 columns. More columns equals greater depth, bigger water content and therefore a higher output, however choice is generally down to aesthetics.

3. Choose a Height

All of the column depths are available in a range of 25 heights. Decide on a section height that matches the size you require, allowing an additional 100mm for cast feet or 97mm for welded feet.

4. Calculate the number of sections you require

Listed next to each section height under 'BTUs/Watts' will be the output each section gives. Divide your required output by this number to find the total number of sections needed to match the output; e.g. if you have chosen a 3 column 602mm high then 7680 BTUs divided by 205 BTUs per section = 38 sections.

5. Size the finished product & double check

Each section regardless of how many columns it has is 45mm wide, therefore a 38 section radiator will equal 38 x 45mm = 1710mm wide, plus 26mm bushes plus valves. If this is too wide then either increase the height of each section or choose a section with more columns.

For example; 3 column 752mm high = 7680 BTUs divided by 252 BTUs per section = 31 sections = 1395mm wide. or 4 column 602mm high = 7680 BTUs divided by 270 BTUs per section = 29 sections = 1305mm wide.

6. Choose the mounting option

Included in your radiator price you have standard wall brackets. The correct number of brackets and wall ties will be supplied with each order; prices for extra wall brackets and wall ties are available on request, please call 0113 244 9444

Alternative Floor Mountings options are also available;

- Cast feet give the finished radiator a traditional look
- Welded feet will give you a more contemporary feel
- Select required option and add to section price.

Note: Bare Metal Lacquer Heritage radiators are only available to be mounted with universal wall brackets or welded feet

Help & Advice;

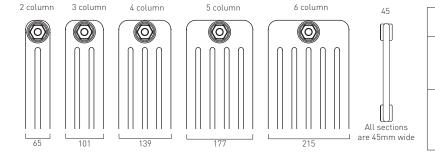

Sizes can be achieved by combining column depth, height and number of sections to achieve desired output. Heritage sections are 45mm wide, therefore the total radiator length is;

"no. of Sections x 45mm + 26mm for bushes + valves" (Note due to manufacturing tolerances widths may vary by +/- 2mm).

When considering the height of your radiator remember that your mounting option will affect the overall height of your radiator.

Heritage radiators are supplied factory assembled up to a maximum of 40 sections. For radiators outside these parameters please consult Customer Services to discuss your requirements. All Heritage's come supplied as a finished radiator with $\frac{1}{2}$ " B.O.E. (Bottom Opposite End) connections as standard.

Heritage Range - priced by section

Pipe Centres for all Heritages with Cast Feet, Welded Feet or Wall Brackets are;

Pipe centres left to right = number of sections x 45mmplus 26mm (13mm each) for bushes plus valves. Note due to manufacturing tolerances widths may vary by +/- 2mm.

Pipe centres from wall (based on adjustable wall ties)

2 Column = 64mm to 74mm

3 Column = 82mm to 92mm 4 Column = 102mm to 112mm

5 Column = 120mm to 130mm

6 Column = 140mm to 150mm

2 Column - 65mm Deep

Heritage Range Standard Wall Brackets

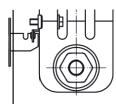

The correct number of brackets and wall ties will be supplied with each order; prices for extra wall brackets and wall ties are available on request, please call **0113 244 9444**

Standard Wall Brackets for White & Colour

Heritage's with Wall Brackets can be positioned at any height (minimum height from floor 100mm); brackets are supplied with raw plugs.

Standard wall brackets technical & pipe centre information (suitable for stud walls) (appropriate for all finishes except Bare Metal Lacquer)

Can be positioned at any height (minimum height from floor 100mm); brackets are supplied with raw plugs.

Pipe centres from wall:

2 column = 64mm - 74mm

3 column = 82mm - 92mm

4 column = 102mm - 112mm

5 column = 120mm - 130mm

6 column = 140mm - 150mm

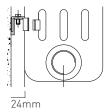

Wall tie; adjusts from 32mm to 42mm

Standard Wall Brackets for Bare Metal Lacquer

(bare metal lacquer only)

Heritage's with Universal Lacquer Wall Brackets can be positioned at any height (minimum 100mm from floor)

Pipe centres from wall:

2 column = 56mm

3 column = 74mm

4 column = 93mm

5 column = 112mm

6 column = 131mm

Optional extra wall ties for Heritage Radiators

(not available for bare metal lacquer finishes)

If you require additional wall ties please call 0113 244 9444 to ask about pricing

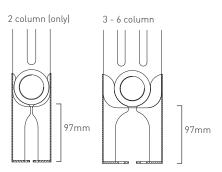

Wall tie; adjusts from 32mm to 42mm

Heritage Range Floor Mounted Options

Once you have chosen your radiator size you can choose to have your Heritage Radiator floor mounted by selecting either Welded or Cast feet (fittings are available to order with a corresponding radiator only).

Heritage Kits for Welded Feet

Please remember to add 97mm to the height of the Heritage section you have chosen if you are using Welded Feet.

Sections	No. of Feet	White Ex VAT	Colour / Lacquer Ex VAT	White Inc VAT	Colour / Lacquer Inc VAT
