

Cascading Z-Fold Card

Start with a piece of card stock cut to 6 1/4" X 9 3/4"

Turn card base around so short slanted side is on the right. Fold to create a reverse Z like the photo below. You can also fold it the opposite way if you prefer.

To cut patterned panels: Start with paper measuring 6" X 2 3/4". Using a ruler, place the paper 1/2" from the bottom of the panel and draw a line along the slanted edge at the top. Cut and center.

To cut black panels: Start with paper measuring 6" X 2 7/8". Using a ruler, place the paper 3/8" from the bottom of the panel and draw a line along the slanted edge at the top. Cut and center.

*NOTE: In the video, I just eyeballed this but this measurement is perfect! (When drawing on black paper, use a white gel pen.)
