*The Camo Experts!*

CORPORATE WEAR CATALOG  
**2022-2023**

## Corporate Wear

**G**amehide® has been outfitting outdoorsmen and women with high-performance garments for over 35 years. Recognized for innovative fabrics, treatments and designs, Gamehide® products have been tested and proven in the field in the most trying conditions. Who better, then, to supply outdoor lifestyle garments for your company or event! Available in a variety of styles for both men and women, Gamehide® Corporate Wear is certain to impress.

**Gamehide® Corporate Wear is loaded with innovative fabrics, proven treatments and features that truly make a difference!**

**HyperHide® HyperHide®**  
HyperHide® fabrics are made from high-performance, two-layer "bonded" fleece. It's the perfect hunting fabric when you're looking for soft, silent performance. It resists wind, repels moisture but still breathes extremely well.

**SuppleTUFF® SuppleTUFF®**  
This fabric is incredibly light, supple and comfortable. There's no break-in time and it's tough as nails! It repels moisture and burrs. It won't shrink or fade and it dries quickly.

**TechPlus®**  
TechPlus® is the time tested waterproof/breathable laminate with precisely sized pores that allow small vapor molecules to escape while keeping larger water molecules from penetrating. TechPlus® is ideal for the most demanding foul-weather conditions.

**Clever Cloth™**  
Clever Cloth™, the un-cotton, features all the comfort of cotton, but none of its substantial shortcomings. Every bit as soft and comfortable, Clever Cloth™ dries quickly and doesn't fade or shrink!

**Outcast™**  
Our first line of defense against mother nature, Outcast™ water-beading treatments are applied to the outer layer of fabric. This causes moisture to "bead-up" and run off your garment instead of soaking in.

**4-Way Stretch**  
No matter how you move, you won't feel any bunching or resistance because the fabric moves with you. 4-Way Stretch is a Gamehide® exclusive!

### AVAILABLE CAMOUFLAGE PATTERNS

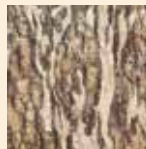

**Realtree® Edge™ (RE)**  
With a strong trend of patterns developed in a digital world that claim disruption of the human form is more important than blending into your hunting environment, only Realtree® brings you realistic elements that match your hunting surroundings, completely erasing the human form.

**Realtree® Xtra™ (RX)**  
Designed to conceal and blend regardless if you hunt hardwoods, pine thickets, flooded timber, croplands or even rocky terrain, Realtree® Xtra™ will keep you concealed in your treestand or stalking in the field. Realtree® Xtra™ features improved high-lights and contrast with a lighter, more universal color palette.

**Mossy Oak® Shadow Grass™ (DSG)**  
Mossy Oak® Shadow Grass™ is the original and first waterfowl-specific camo pattern ever made! Incorporating the most realistic, digitally accurate images of the actual natural elements that make up a true waterfowl habitat, it's become the standard for waterfowling.

**Mossy Oak® New Bottomland™ (NBD)**  
Features the legendary outline-breaking ability that helps hunters blend into dark hardwoods, flooded timber and treestand environments. Add new printing technology and softer edges, New Bottomland™ adds even more to this classic bark, sticks and leaves hunting pattern.

**Mossy Oak® Shadow Grass™ Blades (SB)**  
A precise arrangement of individual blades of grass, whether windblown, broken or bent, over thatch to create the perfect pure grass pattern. Carefully placed shadows atop the thatch, incorporates light to dark spots creating depth that gives a realistic 3D appearance and superior ability to break up a hunter's outline.

**Naked North® (NN)**  
Designed for hunters who hunt in the North! It's made up of the aspen, pine, birch, maple, oak and various types of brush common to so many of the northern sections in the country. And, there are no leaves – thus, the name "Naked." State-of-the-art depth-enhancing technique maintains its dimensional depth.

**Shape Shift® (SS)**  
ShapeShift® is nature's digital camo. It uses true-to-nature colors, tones and shading and an exclusive DepthTech technique to create a hybrid pattern that's difficult to discern and effective in virtually any environment. It's using nature against itself and there is nothing else like it!

# HIGH-PERFORMANCE HOODIE

## MID-WEIGHT FLEECE HOODIE

Everyone loves a quality hoodie! Ours uses performance fleece fabric with a special easy slide finish so outer garments slide on easily and won't bind and pull. The fleece wicks moisture and dries quickly.
