Hegen PCTO™ Drinking Bottle PPSU

Instructions for Use

**BPA
BPS
FREE**

Phthalate-Free
and PVC-Free

Inspect all items before each use. Throw away at the first sign of damage or weakness. The bottle and accompanying parts may blur after repeat use, wash, warming and sterilising. **For safety and hygiene reasons, we recommend replacing components every 6 months.**

For more information on our products, please visit www.hegen.com

Part	Material	Heat Resistance
Spout	Polypropylene (PP)	-20°C to 110°C
Seal	Silicone	
Container	Polyphenylsulfone (PPSU)	-20°C to 180°C

For your child's safety and health WARNING!

Always use this product with adult supervision • Continuous and prolonged sucking of fluids will cause tooth decay • Always check food temperature before feeding • Keep all components not in use out of the reach of children • Before first use, clean the product • Inspect before each use. Throw away at the first signs of damage or weakness • Before first use place in boiling water for 5 minutes. This is to ensure hygiene • Clean before each use • Dishwasher safe (top rack only) – Food colouring, milk or oil residue that undergo heating processes may stain or discolour parts permanently • Do not warm contents in a microwave as this may cause uneven heating and could scald your baby • Do not use in a heated oven or microwave. Always stir heated food to ensure even heat distribution and test the temperature before the serving • This is not a toy • Do not allow child to play with small parts or walk/run while using bottles or cups • Never attach to cords, ribbons, laces or loose parts of clothing. The child may be strangled • Do not use abrasive cleaning agents or solvents as these may cause damage • Do not place components directly on surfaces that have been cleaned with anti-bacterial cleaners. Plastic materials may be affected by high temperatures and sterilising. This can affect the fitting and aesthetics of the product • Proper assembly is necessary to ensure a leak free seal.

Cleaning:

Always wash your hands with soap before cleaning, sterilising and feeding • Before first use, disassemble all parts of the product, wash with bottle detergent and rinse in clean water thoroughly before sterilising. This is to ensure hygiene. Always take all components apart and wash the product with bottle detergent immediately after each use • When using a dishwasher (top rack only), avoid high-heat settings like "sanitary clean" or "heat boost" which may distort components • Do not use chemically aggressive or abrasive cleaning agents, solvents or anti-bacterial cleaners as these can damage the product • Cleaning the product with a wired bottle brush may cause scratches • Remember to clean all sides as well as the base and covers of the bottles.

Sterilising:

Suitable for sterilising by steam (electric), boiling water or cold water tablet/liquid solution. Should you choose to sterilise by an electric steam steriliser, the sterilising instructions of the sterilisation devices should be carefully observed. For boiling: Bring the water to boil, submerge components in boiling water for no more than 3 minutes. For sterilisation, all components should be completely taken apart to avoid different reactions of materials which can cause deformation. All grease or oil residue should be thoroughly removed before sterilising to avoid permanent staining of parts. Chemical sterilisation or the use of hand cream and/or sun cream may cause the print to fade.

Assembly:

Proper assembly is required to ensure a leak-free experience. 1)Ensure **Spout** is assembled with removable seal (Hegen logo facing outwards) to ensure air tight storage. 2)Hold the assembled **Spout** and **Press-to-Close** onto the bottle. 3)To tighten, turn in clockwise direction. 4)**Twist-to-Open** in anti-clockwise direction. 5)Flip **Spout Top** to open for drinking.

Usage:

Before first use, clean the product • Proper assembly is required to ensure a leak-free experience • Do not fill bottle exceeding the maximum indicated volume line • Do not fully tilt bottle while drinking to avoid choking or spillage • Recommended for lukewarm or cold beverages • **Do not fill with hot liquids** or warm contents in a microwave as this may cause uneven heating and could scald when drinking.
