Electronic Water Leveller

THE EASIEST AND MOST RELIABLE WAY TO KEEP YOUR POOL FULL

How Does it Work?

Do you want to spend your spare time filling your pool with a garden hose? Of course not. Let the Water Witch electronic water leveller do the work for you.

The Water Witch is Australia's most trusted water leveller, using an electronic sensor to continuously monitor the water level in your pool and add water when it's required. With its exclusive smart sense technology the Water Witch is accurate, reliable and can even recognise when there is a problem with your pool water level.

With a host of features and settings, the Water Witch is the best option to maintain the water level in pools, ponds, tanks or any other water project.

Adding a Water Witch to our pool was the best decision we could make. We don't need to do anything and yet the pool is always topped up ready for swimming.
