## RING SIZING GUIDE

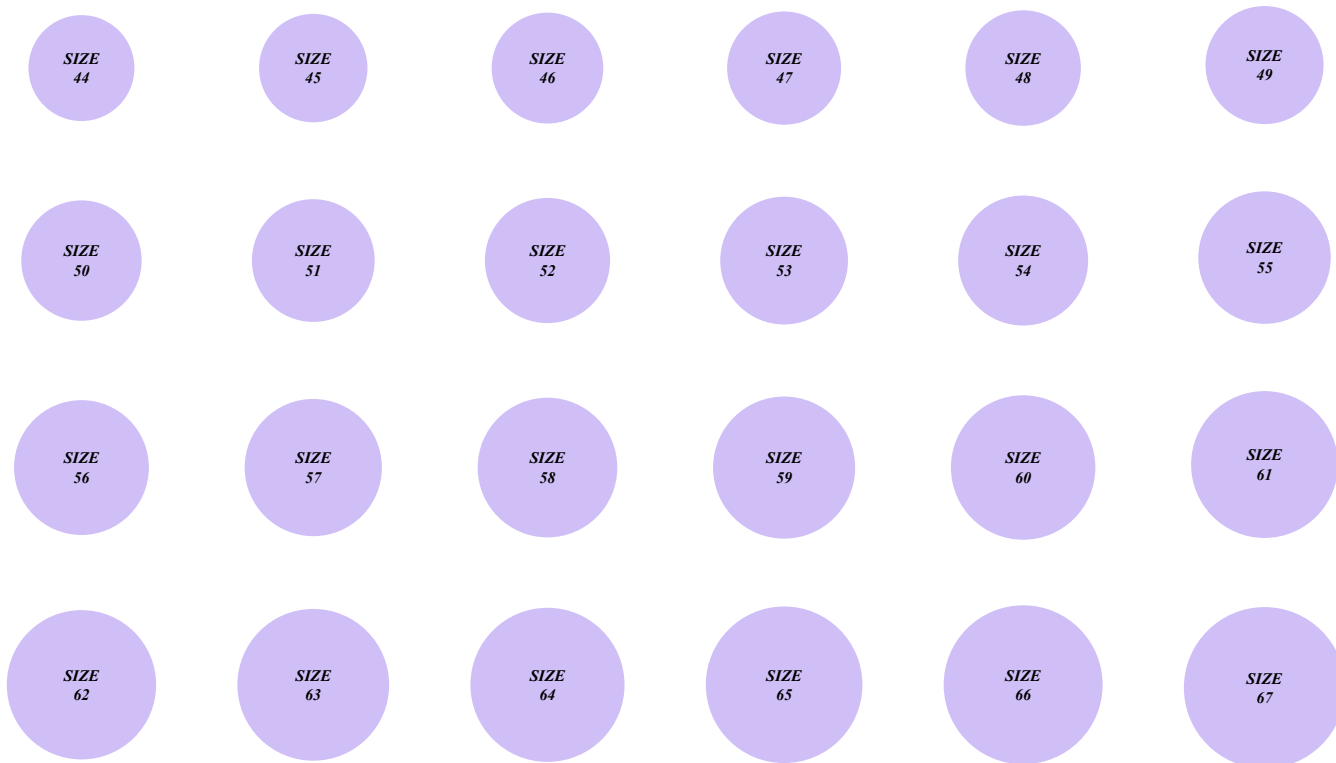

Print this guide in A4 size so that it is scaled to 100%.

### EU sizing

Don't worry about size. We have your back and can help you find the perfect size according to your wearing preference. Below there are basic measurements options. Get in touch with us for more help.

### OPTION 1:

Rings are generally measured using the diameter. Match the inner band circle of the ring with one of the circles below. Please keep in mind you should see only the purple circle with no white space inside your ring. If your fit falls between two sizes, choose the larger one.

#### OPTION 2:

Use a string or ribbon and wrap it around the base of your finger.  
To ensure the ring fits comfortably, we suggest measuring your knuckle as well.  
We recommend selecting a size that will slide on and off your finger easily.  
With a pen, mark the point on the string where the ends meet.  
Measure the string in millimeters with a ruler.  
Choose the closest measurement on the chart below to identify your ring size.

#### Tips:

The string or ribbon must fit snugly to produce an accurate size reading. For more precision, measure your finger at different times of the day, and on different days to provide comparisons.

\*The measurement of the string (in millimeters) corresponds with the EU size. Please use our size tables below to convert your EU size to a UK size or a US size.

Measure the string in millimetres with a ruler.

\*Choose the closest measurement on our **Conversion Chart** in page 3.
