

CANTON SMART APP FEATURES

CANTON

THE NEW CANTON SMART APP

The key features at a glance:

Musikstreaming

Stream your favorite music via Spotify, Deezer or Tidal and many other streaming services

Internal Apps

Listen to your favorite radio stations, podcasts and Deezer playlists and save them directly to one of 10 presets

Radio stations & Podcasts

Listen to your favorite radio stations or podcasts regionally or internationally in high quality for free

10 Presets

With the 10 preset buttons you can save all content from the internal apps and Spotify on a single device or speaker groups. All sound settings are also saved

Multiroom

Stream the same or different music to every room in your home

Device and music control

Control all content of the smart speakers in your network and keep an overview of all devices

Remote control

Control all functions of the smart remote control via the smart app and use the direct input selection and expansion to 10 presets even more conveniently

High-resolution music playback

The Smart App always automatically selects the highest available resolution (maximum 24bit, 192 kHz)

Sound settings

Control all sound settings such as bass, midrange and treble as well as different play modes. Set the exact listening distance and volume per speaker as well as many other functions

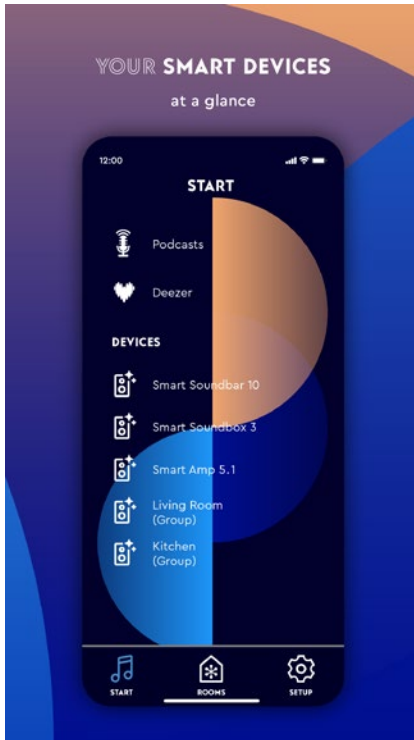

Add new devices

Use the Smart App to find all network devices that are not yet integrated into the network and set them up. Likewise, set up your home theater setup within one room
