FORK BOOTS W/ 10-YEAR WARRANTY

I'm sure like many others you are fed up of cheap fork boots that fall apart as soon as you come back from your first ride

Although our exclusive Classic British Spares fork boots are more expensive than the \$20 eBay specials, our fork boots *will actually last and NOT fall apart*

In fact, our fork boots are so durable and strong they might outlive you and your machine despite our 10-year warranty... *take that \$20 fork boots!*

Please see backside of page for installation tips & warranty details

INSTALLATION TIPS

#97-1645 / H1645

When installing the [97-1645 / H1645](#) fork boot on your Triumph, make sure that the rubber with the 2 thinner (small ID) ribs are facing up

Use the [97-2083 / H2083](#) clips to secure the fork boots to your fork seal holder and top fork abutment collars

Correct for models from 1964-1968(ish)

#97-3635 / H3635

When installing [97-3635 / H3635](#) fork boot on a Triumph twin or Triumph triple, make sure that the deep internal groove inside the rubber boot end goes up

This groove sits inside the top fork abutment collar that has a deep groove

When installing this fork boot set on a BSA twin from 1969-1970, you will install the fork boots like the above Triumph but opposite, the internal groove goes down, not up

Fork clamps are not required on BSA or Triumph models that use the 97-3635 / H3635 rubbers

#42-5320

When installing the [42-5320](#) fork boot on a BSA single or twin, the fork boot can be fitted either way (non-directional)

You must use the proper [60-0340 clamps](#) that we offer on the website to secure your fork boots on all applications that call for the 42-5320 fork boot

Please see backside of page for installation tips & warranty details

WARRANTY

Since offering our fork boots to the market (2014), we have not had 1 single warranty claim on any boot, however, should you have an issue with your fork boots, we will cover the fork boots and any additional costs if the boot happens to be defective or damaged

We ask that you provide this slip for record purposes during a warranty claim

We will not cover any installation mishaps... sorry!
