Simple Design, Superior Quality

X4S Series is the first frameless solar LED street light developed by PBOX. The solar lighting system integrates high conversion double-sided monocrystalline solar panel, high luminous LED lamps, long life and environment friendly batteries with intelligent battery management system, and high-efficiency and stable controller.

The frameless solar panel prevents the build-up of dirt, allowing the system to work at maximum efficiency.

Solid & Reliable Bracket Structure

The high strength 6063 aluminium alloy, corrosion resistant anodized surface, and special structure design, makes the bracket strong, secure and reliable.

High tensile

Light weight

Anti-corrosion

Anti-16 typhoon

Excellent heat dissipation

IK08

Efficient Double-Sided Solar Panel

X4S uses the unique designed double-sided PV module and tempered glass on the panel, which minimizes the risk of degradation of the panel, enabling long-term use.

- **Black dual glass solar module, maximum energy generation.**
- **Mono-crystalline solar panel, Up to 22% conversion efficiency.**

LiFePO4 Li-ion Battery

Green and environmental-friendly LiFePO4 Li-ion battery. The battery can charge and discharge over 2000 times.

Overcharge & over-discharge protection, Stable performance, high temperature resistance.

High Efficient LED

Using high-efficiency LED, luminous efficiency is up to 180lm/W (@25 C). The lights sealing lens is made of strong anti-ultraviolet PC, which has anti-aging and anti-impact performance, enabling long term usage.

With the unique design of the optic lens, arrows us to eliminate the lighting pollution to the environment.

Bat Wing Light Distribution

The new lens design improves the lighting effect and lighting uniformity, while also increasing light coverage.

PBOX X4S comes complete with built-in motion detection system that automatically regular the light source from full bright to dim mode to increase battery autonomy.

100% Brightness when motion is detected

25% Brightness when no motion is detected

For example: when the battery storage capacity is sufficient, the lamp power is on standard output (100% brightness when it detects someone, 25% brightness when no one there).
