OUR STORY

The story of Alpha Scents, Inc. begins with president and founder, Dr. Darek Czokajlo. When speaking about entomology, he will laugh and say the interest began “in the womb.” Driven by his passion for science and technology, he strives for economic security, which can be largely attributed to his upbringing in communist Poland. How do you become economically stable according to Darek? By building a company that is customer focused: embracing honesty, respect, trust and support, the rest are details. When discussing what characteristics Alpha Scents, Inc. reflects, it’s clear that the vision for the company is shaped by a desire to be loyal to all stakeholders, including customers, vendors, and his employees.

Since childhood, Darek was involved with biology clubs and interest groups, fueling his passion for the sciences and leading him to study forestry and entomology during his undergraduate and master’s studies. In 1985 he started studying and experimenting with insect traps, in particular bark beetle traps baited with ethanol lures. This is how Darek started honing his specialization and began asking the intriguing question of, “How could we use scents to manage insects?” In 1989, right before the fall of Communism, Darek emigrated to Canada and in 1993 started his PhD program in the field of Insect Chemical Ecology in Syracuse, New York.

After his graduation in 1998, one of his professors recommended Darek to a company in Portland, Oregon. This was a great and challenging opportunity as Darek was able to develop new lures, traps, and pheromone-based pest management tools in forestry and later diversifying into agricultural entomology. During this time, he brought in many grants and began making key contacts in the industry, government and research communities. Because of his research, he was largely in charge of R&D and production from start to finish. Then, in 2007, Darek created Alpha Scents, Inc.

In order to be successful in this specialization, we have met with clients, both domestic and international, firsthand. Darek has attended international symposiums and tradeshows throughout the world and has formed global business partnerships to help further his visions. He has participated in research opportunities in places like Kenya, South Africa, Turkey, Poland, China and many others - where he also manages international research and development programs for Alpha Scents’ products.

At Alpha Scents Inc., we research, register, manufacture and market pheromone-based products for insect monitoring and control. Our products are designed to significantly reduce the use of pesticides and provide a more environmentally friendly method of insect management. We provide our customers with the best quality products on the market by ensuring that manufacturing is done by skilled technicians and under the direct supervision of PhD Chemical Ecologists.

Above all, and after all these years, we have learned that what’s most important in our business practice is honest dealings with concerned growers, collaborators, vendors and employees. We look forward to the opportunity to work with you!

- Alpha Scents, Inc. Team

Integrated Pest Management (IPM) is the cornerstone of modern pest management techniques. IPM relies on a broad-based approach, designed to keep pest populations below the level at which they cause economic damage. IPM seeks to manage pests with the least amount of disruption to the natural eco-system and therefore encourages use of sustainable pest control practices.

Because IPM does not seek to eradicate all insects, the costs of pest control can be reduced through the implementation of an IPM program. Traditionally, the role of insect traps and lures has been to monitor for the presence of pests that can pose a threat to crops. Once a pest population reached a specified level, the grower would apply pesticides or other pest control products. Through proper timing of control products, the grower can maximize the efficacy of his or her insect control program and subsequently lower costs.

IPM PRODUCTS

There are two primary components of monitoring products: traps and lures. Insect lures consist of an attractant, either a pheromone, kairomone or a combination of the two, formulated into a release device.

Pheromones are chemicals that trigger a social response in members of the same species. Kairomones on the other hand, are chemicals emitted by one species that signal members of a different species. For example, plants will give off chemicals, called volatiles, that will attract insects that feed on that plant.

Insect trap designs will vary depending on the targeted pest and they can be made out of numerous materials. Alpha Scents uses only *No-Mess Adhesive™* in our insect traps so you don't have to worry about getting glue all over your clothes, vehicles, or hands.

While conventional commercial growers use monitoring products for the purpose of timing control product application (usually pesticides), many people use monitoring products to help manage insect populations, which, for example, are crucial for an organic grower.

PEST MANAGEMENT

It is important to understand that the purpose of insect traps and lures is to monitor pest populations so that effective management techniques can be timed to optimize efficacy. Monitoring products are not designed to control insect populations by themselves. That being said, insect traps and lures have been used successfully in mass-trapping programs. These programs have reduced pest populations below the economic threshold over time. However, you should consult with an extension agent or other pest control professional prior to employing this technique.

TRAPS

SINGLE USE PAPER DELTA TRAPS (RED/CLEAR) - TARGET PESTS: MOTHS (*LEPIDOPTERA*)

PRODUCT DETAILS	QUANTITY	PRICE
<ul style="list-style-type: none"> • Size 7L x 4W x 4½ in. (18L x 10W x 11.4H cm) • Sticky Area (interior only) 3-sided • Grid Size 1x1 in. (2.5 x 2.5 cm) 	Single	\$3.40
	25 pc.	\$47.00
	100 pc.	\$178.00

CONNAS	Swede Midge Lure	<i>Contarinia nasturtii</i>	\$12.80		
CYLFOR	Sweet Potato Weevil Lure	<i>Cylas fomicarius</i>	\$3.50	\$44.00	\$153.00
EUWFOR	Tea Shothole Borer Lure	<i>Euwallacea fornicatus</i>	\$7.60		
PANLIM	Threelined Leafroller Lure	<i>Pandemis limitata</i>	\$3.50	\$44.00	\$153.00
HELVIR	Tobacco Budworm Lure	<i>Heliothis virescens</i>	\$3.50	\$44.00	\$153.00
SPOLIT	Tobacco Cutworm Lure	<i>Spodoptera litura</i>	\$3.50	\$44.00	\$153.00
MANSEX	Tobacco Hornworm Lure	<i>Maduca sexta</i>	\$6.70	\$110.00	\$405.00
TUTABS	Tomato Leafminer Lure	<i>Tuta absoluta</i>	\$3.50	\$44.00	\$153.00
KEILYC	Tomato Pinworm Lure	<i>Keiferica lycopersicella</i>	\$3.50	\$44.00	\$153.00
PSUUNI	True Armyworm Lure	<i>Psudaletia unipuncta</i>	\$3.50	\$44.00	\$153.00
PLAIDE	Tufted Apple Budmoth Lure	<i>Platynota ideausalis</i>	\$3.50	\$44.00	\$153.00
AGRSEG	Turnip Moth Lure	<i>Agrotis segetum</i>	\$3.50	\$44.00	\$153.00
ARCCER	Uglynest Caterpillar Lure	<i>Archips cerasivorana</i>	\$3.50	\$44.00	\$153.00
PERSAU	Variiegated Cutworm Lure	<i>Peridroma saucia</i>	\$3.50	\$44.00	\$153.00
PLAFLA	Variiegated Leafroller Lure	<i>Platynota Flavedana</i>	\$3.50	\$44.00	\$153.00
TRICAM	Velvet Longhorn Beetle Lure	<i>Trichopherus campestris</i>	\$7.60		
PLAFIC	Vine Mealybug Lure	<i>Planococcus ficus</i>	\$3.50	\$44.00	\$153.00
RHACOM	Walnut Husk Fly Lure	<i>Rhagoletis completa</i>	\$5.60	\$89.00	\$343.00
PITJUG	Walnut Twig Beetle Lure	<i>Pityophthorus juglandis</i>	\$5.10	\$80.00	\$254.00
TINBIS	Webbing Clothes Moth Lure	<i>Tineola bisselliella</i>	\$5.60	\$89.00	\$343.00
DIODIS	Webbing Coneworm Lure	<i>Dioryctria disclusa</i>	\$3.50	\$44.00	\$153.00
CEPLAR	Web-spinning Larch Saw Fly Lure	<i>Cephalcia larciphila</i>	\$3.50	\$44.00	\$153.00
METHEM	West Indian Sugarcane Weevil Lure	<i>Metamasius hemipterus</i>	\$3.50		
DRYCON	Western Balsam Bark Beetle Lure	<i>Dryocetes confusus</i>	\$7.60		
LOXALB	Western Bean Cutworm Lure	<i>Loxagrotis albicosta</i>	\$3.50	\$44.00	\$153.00
RHAIND	Western Cherry Fruit Fly Lure	<i>Rhagoletis indifferens</i>	\$5.60	\$89.00	\$343.00
DAVIR	Western Corn Rootworm Lure	<i>Diabrotica virgifera</i>	\$5.60	\$89.00	\$343.00
FRAOCC	Western Flower Thrips Lure	<i>Frankliniella occidentalis</i>	\$3.50	\$44.00	\$153.00
HARBRI	Western Grapeleaf Skeletonizer Lure	<i>Harrisina brillians</i>	\$5.60	\$89.00	\$343.00
DENBRE	Western Pine Beetle Lure	<i>Dendroctonus brevicomis</i>	\$9.60		
EUCSON	Western Pine Shoot Borer Lure	<i>Eucosma sonomana</i>	\$3.50	\$44.00	\$153.00
PARROB	Western Poplar Borer Lure	<i>Paranthrene robiniae</i>	\$5.60	\$89.00	\$343.00
ACATRI	Western Spotted Cucumber Beetle Lure	<i>Acalymma trivittatum</i>	\$5.60	\$89.00	\$343.00
CHOOCC	Western Spruce Budworm Lure	<i>Choristoneura occidentalis</i>	\$5.60	\$89.00	\$343.00
DIAUUN	Western Striped Cucumber Beetle Lure	<i>Diabrotica u. undecimpunctata</i>	\$5.60	\$89.00	\$343.00
MALCAL	Western Tent Caterpillar Lure	<i>Malacosoma californicum</i>	\$5.60	\$89.00	\$343.00
SPOPRA	Western Yellow Striped Armyworm Lure	<i>Spodoptera praefica</i>	\$3.50	\$44.00	\$153.00
FARDIF	Wheat Head Armyworm Lure	<i>Faronta diffusa</i>	\$3.50	\$44.00	\$153.00
ORGTHY	White Spotted Tussock Moth Lure	<i>Orgyia thyellina</i>	\$5.60	\$89.00	\$343.00
OPEBRU	Winter Moth Lure	<i>Operophtera brumata</i>	\$9.60		
GNATHO	Wood Stainers Lure	<i>Gnathotrichus sp.</i>	\$12.80		
VESPUL	Yellow-jacket Wasp Lure	<i>Vespula spp.</i>	\$3.50	\$44.00	\$153.00
AONCIT	Yellow Scale Lure	<i>Aonidiella citrina</i>	\$3.50	\$44.00	\$153.00

Here are some guidelines that should always be followed regardless of the trap and lure that you are using:

- Never put more than one lure in a trap;
- Always follow manufacturer's recommendations regarding replacing the lure and the trap or trap liner;
- Check the trap frequently;
- Never discard an old lure in the field.

Most Alpha Scents lures have different field lives. Please check the applicable technical bulletin that can be found on our website - www.alphascents.com.

In addition to using monitoring products and control products when indicated, cultural controls can also help reduce problems with unwanted insects. Specific actions will depend on the pest, crop and local conditions. However, as a general rule, proper sanitation such as removing fallen fruit, properly destroying pruned branches as well as keeping orchard free from overgrowth.

SHIPPING POLICY:

- We ship prepaid and invoice you for the charges.
- Rush shipments available upon request.
- UPS and USPS are used whenever possible.
- Should your order exceed UPS size or weight limits, *Common Carrier* will be selected to speed delivery.
