

Paper Delta Trap (red)

Single use

For moth pests

January 2009

A durable, single use paper trap used to monitor and mass trap agriculture, horticulture, forestry, and backyard moth pests. No insert is required. Trap comes coated on the inside with *No-mess Sticky Card™* adhesive. Fold, staple, and hang. Field tested to remain effective in any weather.

- Low cost single use - disposable
- *No-mess Sticky Card™* coated
- UV resistant color will not fade over time in intense sunlight.
- Waterproof
- Withstands heavy winds when properly hung

Hanging Tip

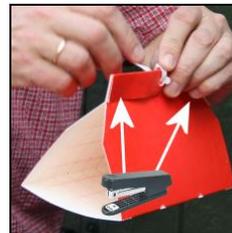

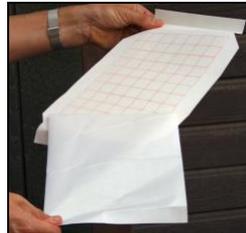

Consult the instructions for each lure for best trap placement - height and whether on the outside or inside of foliage.

To avoid heavy winds blowing the trap off the plant, wrap each end of the hanger one time around the same branch, one end clockwise, the other end counter clockwise, twisting both ends together.

ASSEMBLY

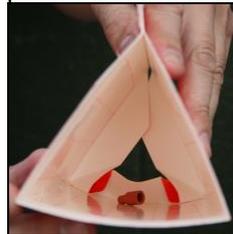

Crease all fold lines with adhesive cover on still on...

peel adhesive cover diagonally... staple top...

fold in one end...

place lure on bottom...

fold in other end...

hang trap on tree.
