

AUTOMATIC 3 HANDS WITH DUAL TIME AND OPEN HEART

A) DISPLAY

B) WINDING THE MAINSPRING

Automatic winding watch can be hand wound by turning the crown in normal crown position. Wind 15-20 times and it will start to move naturally after shaking slightly.

C) TIME AND DUAL TIME SETTING

I. Time Setting

1. Pull the crown to position 2.
2. Always turn the hands clockwise to set the HOME TIME.
3. Push crown back to position 1 after time setting.

II. Dual Time Setting

1. Pull the crown to position 2.
2. Turn the hands backward (the hour hand of Dual Time remains unmoved while all other hands are moving backward.)
3. Continue turning the hands backward to the desired Home Time differ to the Dual Time.
4. Adjust the hands clockwise to set the Home Time. (the hour hand of Dual Time will move forward simultaneously.)
5. Push the crown back to normal position after time setting.

NOTE:

This watch MUST be worn for at least 8 (Eight) hours each day to ensure it is fully wound.

An automatic watch will only wind when the watch is on your wrist and your arm moves.

Winding the watch by the crown will put power on the spring but not enough to allow the watch to function fully.

If your watch stops overnight or loses time it means it is not being fully wound.
