

TRACK JACK WAIVER TO SIGN

To customers of Industry-Railway Suppliers, Inc., who are purchasers of Simplex Track Jacks Models A5, A8 and A17:

It is important for safety purposes that Simplex Track Jacks be sold only to customers who state that they intend to use the jacks in bona fide track maintenance or installation applications. By signing this form, you have represented and stated to us that such is your intention.

The above described Simplex Track Jack models are equipped with a "quick-trip" mechanism for instantaneous load release. Because of this feature, these jacks are definitely not acceptable for general industrial applications which require gradual lowering of the load. It is for this reason that we limit the sale of these Simplex Track Jacks to those customers who intend to use the jacks solely in track maintenance or installation applications.

To acknowledge your receipt and understanding of this important communication, we request that you sign this form below, and email back to us.

Sincerely,

Industry-Railway Suppliers, Inc.
