

Trick table speaks of light and solid multi-functionality and allows a free interpretation of its uses, table or container. The top consists of two semicircles that can be opened at 90 degrees so as to have access to the "container shelf". Once closed, the top works like a normal table top. Attention to detail, typical of Italian manufacturing, is enhanced by the choice of materials and colors. All the paints are made in powder form which is characterized by impeccable finishing and superior durability.

*For particular needs it is possible to customize colors or choose different material finishes.

Technical information

Name and code	Auda table White	OH-M-WHT
