

Uptown & Downtown

Container, tray, stool

yvé

Uptown – Uptown is a multipurpose complement characterized by a central cardboard structure on which a basalt gray 100% cotton paper-fabric has been hand-glued. Uptown, as well as a container, can be used as a table, tray or even a stool, as the solid oak cover / top is able to support the weight of a person. Uptown fully expresses its personality both as a single piece and in combination with Downtown, the furniture of the same family with lower dimensions.

Downtown – Rigorous and recognizable, Downtown has a central structure in cardboard on which a 100% cotton paper-fabric has been hand-glued in a sophisticated basalt gray shade that blends harmoniously with the natural oak of the cover and blends with the stainless steel of the “punto of taking”. The complement, that can be used as well as a container, as well as a tray. Downtown can live as individually, but replicated or in combination with Uptown, furniture of the same family with greater height and in an extra stool function.

Product not suitable for the bathroom environment.

Technical information

Name and code Uptown UT-205
 Category Container / tray / stool
 Dimensions W 32 cm D 46 cm H 45 cm
