# Highlights and news 2023

During all the years of product development, Swedteams aim has always been to produce hunting clothing of high quality and functionality. The result is a wide collection of durable styles with thought-out functions that serves you during the hunt. To make it easier for you to find your favorite fit, we've now decided to pair them together in families. Say hello to Titan, Ridge, Crest, Ultra, Alpha, Protect, Lynx and Bull

## Titan jacket

Titan Pro is our top-level hunting jacket available in two versions; Our solid green stretchy Titan fabric, or in DESOLVE® Veil camouflage, made with recycled polyester. This hunting jacket is equipped with all relevant features a top-level hunting jacket should have.

## Protect jacket & trouser

Powerful and flexible hunting jacket in stretch with good visibility. Made with our COVERTEX® membrane to withstand water and wind.

Our new 2-layer trousers for wild boar hunting. Details, functional solutions and materials are all chosen to suit the dog handler as well as possible.

## Our new Alpha hunting jacket and hunting trouser

Our new Alpha 3-layer series is made for the hunter with high demands. Equipped with Covertex 100, our new Alpha is windproof, waterproof, breathable, lightweight, and flexible with a sportive fit. It allows the hunter to move freely and transports moisture away from the body, to always ensure that comfortable feel.

- Windproof and waterproof
- For an even better hunting experience
- Superior for high altitude hunting
- A sportive fit for fast-moving hunters

## By hunters, for hunters

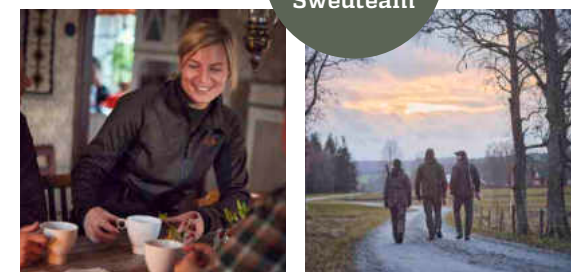

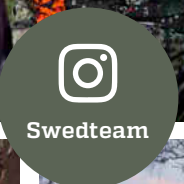

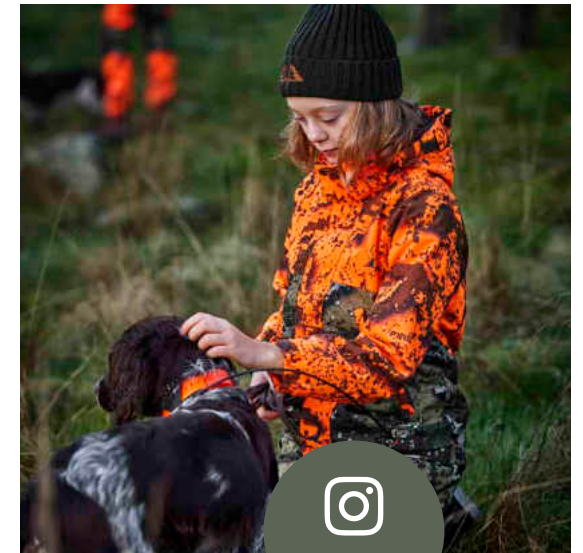

We are happy to have such a close collaboration with our ambassadors, dedicated hunters who reflect our brand. Our ambassadors are represented in several countries in Europe. They have loyal followers and can get close to our customers on a more personal level. Just like us, they are passionate about the hunt and takes great pride in their brand and ours. Together with them we can develop our products to better suit our customers need. That way, we can make sure to deliver products that provide a great hunting experience, year after year.

Meet all our ambassadors at [swedteam.com/ambassadors](https://swedteam.com/ambassadors)

## For the Nordic weather conditions

Based on our experience of the Swedish hunting environment, we set out to develop a revolutionary membrane designed for one of the world's toughest climates. NEONORDIC® is the high-tech membrane developed to withstand Nordic weather conditions. NEONORDIC® 200 is waterproof, windproof and breathable. It has a 20 000 mm water column and 20 000g/sqm/24h, Tested according JIS-standard. It is silent and lightweight with exceptional flexibility and lasting protection, with care in every seam and detail.

## Share your experiences

Share your hunting and nature experiences by tagging us on social media. We love following your adventures, and your experiences help us to continuously develop and improve. Follow us on Facebook and Instagram to see more of this year's new products.

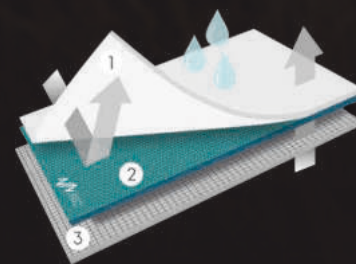

NEONORDIC HUNTING TECHNOLOGY

## NEONORDIC® A nordic material concept with a focus on hunters

Anyone who has hunted in Scandinavia will be aware of the unique challenges posed by the climate here. The weather varies widely during the year, with four unique seasons that each offer specific challenges. This is our workplace, and we derive much of our inspiration from the forests in Långhem. Based on our experience of this environment, we set out to develop a revolutionary membrane designed for one of the world's toughest climates.

### The result is NEONORDIC® Hunting Technology.

- Silent and lightweight with exceptional flexibility.
- High-tech membrane developed to withstand Nordic weather conditions.
- NEONORDIC® 200 used in our garment has focus on comfort and breathing.
- The more you move and sweat, the more our membrane is breathing.
- NEONORDIC® 200 has 20 000 mm water column and 20 000 g/sqm/24h, Tested according JIS-standard.

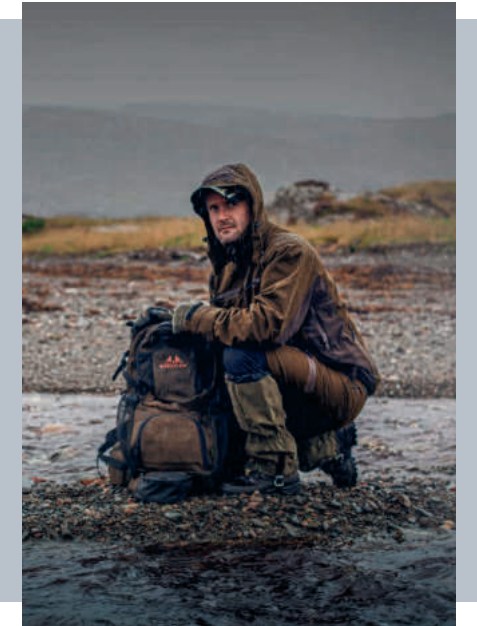

1. Outer fabric - water and wind repellent
2. NEONORDIC®-membrane - breathable, waterproof and windproof
3. Lining

## Waterproof

**A high water column keeps the hunter dry in every environment.**

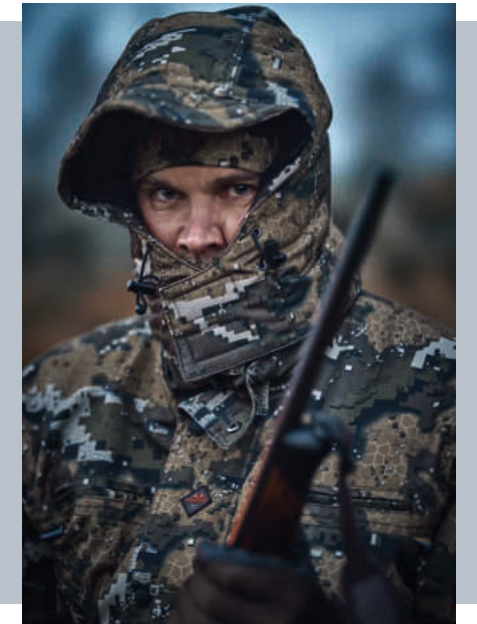

- Homogeneous hydrophilic membrane delivers the highest level of waterproofing.
- Made with recyclable Polyurethane, less harmful than other materials.
- Water column for NEONORDIC® 200 is 20 000 mm.

## Windproof

**A High-tech membrane developed to withstand strong and cold winds.**

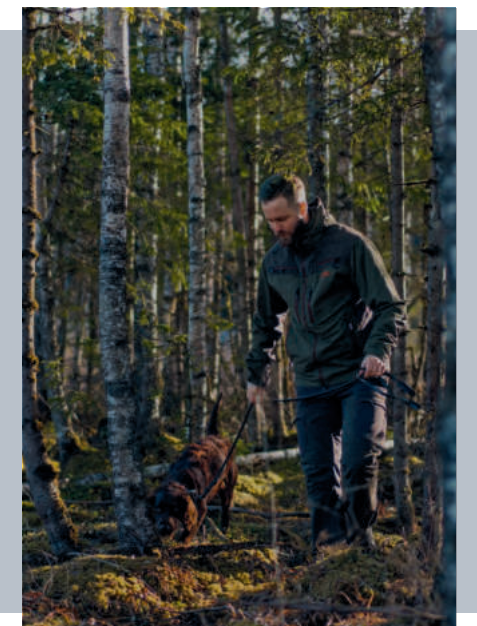

- Designed by hunters for experiences close to nature in a changeable climate.
- Silent and lightweight with exceptional flexibility.
- Lasting protection, with care in every seam and detail.

## Breathable

**A smart, breathable membrane to always ensure the highest possible comfort.**

- Breathability for NEONORDIC® 200 is 20 000 gram/m<sup>2</sup>/24h.
- Hydrophilic membrane adapts to the micro climate inside the jacket.
- Smart garments allow vapor to easily be released for the perfect climate.

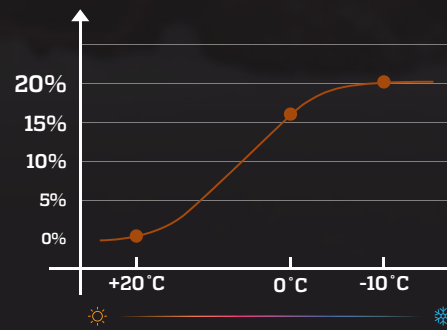

**THERMAL BOOSTER**  
The Next Generation of Smart Insulation

# Thermore® THERMAL BOOSTER The next generation of smart isolation

As you spend a lot of time outdoors, you know you will face different temperatures during long days hunting. Sometimes changes can even occur during the same day. Thermore®'s THERMAL BOOSTER smart insulation is engineered to offer a consistent warmth level under normal conditions. When the temperature decreases, Thermore® THERMAL BOOSTER provides extra warmth, and gradually increases its warmth up to more than 20% so that you can enjoy outdoor life to the fullest - no matter what weather they may have to face.

- New insulation that adapts after the outside temperature.
- Special treatment on outside of insulation increase warming capacity up to 20%
- Made from polyester fibres. Easy care by normal machine washing.
- Features Thermore®'s proprietary fiber migration treatment.

## Extra warmth that always stays with you

- Provides extra warmth when temperatures decrease.
- Re-tunes and adapts when temperatures increase.
- Consistent and durable effect after repeated washing cycles and heavy-duty wear.

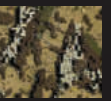

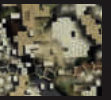

# DESOLVE® Experience the power of invisibility

The vision of an animal is different from human vision in many ways. Camouflaging is about so much more than imitating patterns and colors in the environment. The unique DESOLVE® pattern was created to improve hunting clothes camouflage function. The camo breaks up the outline with large macro and micro shapes creates the illusion of depth, so the subject appears to be a series of small objects spread out across a range of distances.

DESOLVE® focus entirely on how animals experience different colours and patterns.

- The shape of human body gets blurry when you wear the DESOLVE® camouflage in the right conditions.
- With small and large pixels interspersed, a high contrast is created that makes you invisible at all distances.
- Animals cannot see red tones - therefore neon camouflage is a good for visibility of humans while staying invisible to the animals.

## Different patterns to suit different needs

- **DESOLVE® Veil**  
The perfect all-purpose camouflage when hunting in forest and mountains. 
- **DESOLVE® Fire**  
The camouflage pattern for making yourself visible to your fellow hunters, but still invisible to the animals. 
- **DESOLVE® Wing**  
The ideal camouflage pattern for bird and waterfowl hunting. 
- **DESOLVE® Zero**  
The ultimate camouflage pattern when hunting in snow and sub-zero environment. 

antibite™  
REPELLENT PROTECTION AGAINST MOSQUITOES AND TICKS

## Antibite™ The environmentally friendly repellent treatment

Everyone who spends time outdoors in forests and fields knows how annoying it can be with mosquitoes and horseflies buzzing around the head. Antibite™ is the first sustainable solution to the problem. The base of Antibite™ is IR3535, a substance that has been on the market for over 30 years. Technicians in Portugal have found a way to use nanotechnology to make IR3535 adhere to clothing. This technology is what we call Antibite™.

- Environmentally friendly treatment against bugs, mosquitos and ticks.
- A natural substance made by amino acids, named IR3535.
- Nanotechnology treatment secure a long-life function, that lasts up to 80 washes.
- No harmful side effects on humans or animals.

### Antibite is a repellent treatment, not a pesticide

- It does not kill insects, it repels them
- Not absorbed by the body.
- Odorless and has no side effects.

CONPIERCE

## CONPIERCE® Maximum protection against wild boar attacks

The wild boar population in Sweden is large and the hunting takes place all year round. Wild boars are shy creatures that are awake at night and sleep during the day, often in dense and rough terrain. When they are awakened, they can easily become frightened and rush from nowhere. The risk of injury to the hunter becomes obvious, either from the wild boar's sharp tusks or from thorns the rugged terrain. With this in mind, we developed CONPIERCE® - our protective material against bites or puncture from sharp objects.

- CONPIERCE® is a protection layer fabric against wild boar tusks penetrating your hunting garment.
- New approach from Swedteam. Use two separate trousers instead of one. More flexibility and lower weight.
- All new Protect Liner trouser, offers new stretch function for maximum comfort and protection.
- Tested and certified via KWF-Sevices in Germany.

### Feel safe with our wild boar trousers

- Conpierce in entire trouser. Front and back.
- No seams on inside of thigh, for extra protection of blood vessels
- Low weight makes you move faster.

# TITAN

Brand new, top-level hunting garment. Our Titan family is the top collection in terms of function and comfort. It comes in two versions. One is made in strong polyamide fabric with stretch in all parts. The other one is made in Re-Eco, recycled polyester with DESOLVE® Camouflage pattern. We also put our most exclusive membrane inside - NEONORDIC® 200. The jackets and trousers are equipped with all relevant features a top-level hunting item should have.

# Titan.

## TITAN PRO JACKET

Brand new, top-level hunting jacket.

Titan Pro is our new top-level hunting jacket. Only the name is same as before. It is now available in two versions. Solid green colour with our new Titan fabric - with stretch function. It gives you a superior comfort. The other version is with DESOLVE® Veil camouflage. In addition, this fabric is made with recycled polyester. Another new feature is that our NEONORDIC® 200 membrane is laminated directly to the shell fabric. That gives you better waterproof function and a lighter garment. This hunting jacket is equipped with all relevant features a top-level hunting jacket should have.

<b>Fabric</b>	<b>Art.no</b>	<b>RRP</b>

# CREST

Crest Jacket and Trousers is developed to meet the demands of a classic hunter. A long jacket with many pockets, paired with comfortable trousers with wide fit. Available with the classic Thermo-version or the Light option without extra insulation. Crest is also available with Thermore® THERMAL BOOSTER, developed to meet the rough and sometimes cold Nordic weather. THERMAL BOOSTER adapts its ability to warm your body depending on the outer temperature.

## CREST BOOSTER CLASSIC JACKET

Classic hunting jacket with THERMAL BOOSTER insulation.

This is an updated version of our popular Crest Thermo Hunting Jacket. New details and spacious fitting. The hunting jacket is filled with a new type of insulation. THERMAL BOOSTER is a material that changes after temperature. The colder it gets, the warmer the jacket will feel. This hunting jacket has COVERTEX® 100 membrane, 2-layer construction. Various pockets on the front and one large pocket on the back. Updated hood and waist adjustment.

## TECHNOZONE™

By moving into this unique segment in 2019, we made sure to integrate high-end technical functions in our clothes. Each season, our first vest, the FORCE Heat vest were sold out far too soon. Alpha Pro and Alpha Light both using the well-known TechnoZone™ by I-Warm heating system. The I-Warm heat panels are made of a membrane instead of metal wires. This improves all functions; better heat transfer, less power consumption, panels are foldable and they are also machine washable. The I-Warm system is controlled by the power switch on the vest, or by using the app in your smartphone. We use 3-panel system on both vests, 1 panel on the back and 2 on the upper chest.

Alpha Pro has updated design, fit and we use the latest technology with I-Warm 4.0 system. I-Warm 4.0 has a new app control in which you can adjust the heat level on each panel individually.

Alpha Light, equipped with regular I-Warm 3.0 heat panels, is the successor to our popular Force Heat vest.

For maximum efficiency, we recommend that you wear your heat vest as close to your body as possible. Wear it on top of your base layer shirt, as a layer-2 item. If it is very cold outside you can wear a fleece jacket on top of the heat vest.

TechnoZone  
By I-Warm

## ALPHA XTRM TROUSER

*Technical stretch trouser with durable reinforcements.*

New technical trouser in functional and comfortable stretch fabric. Suitable for active hunting in tough terrain. ## Protect Liner Trousers

Our new Swedteam innovation is totally different from other items on the market. It is made with fabrics developed from Formula-1 technology, and is constructed as a cycling bib with stretch fabrics and suspenders to assure the best fit. Our protective wild boar trousers is low weight, below 800 grams, and has double layer inside of the thighs for maximum protection.

- Wear with Protect Pro Shell Trousers
- Conpierce Stretch protection fabric
- Double layers inside
- Weight < 800 gram

## PROTECTION XTRM TROUSER

*Excellent fit and new thorn resistant reinforcements.*

High-quality boar hunting trousers with all materials and details carefully designed to provide high protection. Ultra-durable material protects against stab wounds and minimises wear and tear in tough terrain. Reinforced with protective CONPIERCE® and SPA Para-aramid in the most exposed areas. Made with our prime quality NEONORDIC® 200 membrane for an optimal combination of waterproofing and breathability. Stretch panel on back for added ease of movement. Several leg pockets and traditional side pockets. Extra-high back with buttons for braces and tabs at ends of legs. Our Protection trousers are certified according to EC Type Examination Certificate K-EG 2017/8278. Tested according to German "Technische Spezifikation zur Prüfung von Keilerschutzhosen", DIN EN ISO 13688:2013. Compliant with health and safety requirements according to Annex II of Regulation (EU) 2016/425

# LYNX

Lynx offers a large range of garments for men, women and junior. A variety of jackets, trousers, sweaters, shirts and accessories. The trousers are available in both smooth LIGHT and the stronger XTRM versions. To improve the already high function of Lynx garments, we add the Antibite™ treatment on most Lynx items. A treatment that repels mosquitos and ticks to assure you a more pleasant hunting experience. Since Antibite™ doesn't cause any skin irritation or side effects, it is the perfect replacement to traditional insect repellents.

# SIZE GUIDE

Sizecharts, cm. Measure Circumference or Length directly on your body. See picture.

- 1. Head-Circumference Measure 2 cm above the ears around the forehead.
- 2. Chest Measure under the armpits, around fullest part of the chest and shoulderblades.
- 3. Waist Measure around the area where you normally wear your trousers.
- 4. Hip Measure around your fullest point, approximately 20 cm below your waist.
- 5. Leg Measure from the crotch to your ankle bone.

- A. Hand Length The length of the hand is the distance between the wrist and the tip of the middle finger.
- B. Hand Width Measure the circumference around the palm of its widest point.

## Measurement Gloves

	S	M	L	XL	2XL
A. Length	7	8	9	10	11
B. Width	16,5-17	17,5-18	18,5-19	19,5-20	20,5-21
	15,5-17,5	18-20	20,5-22,5	23-25	25,5-27,5

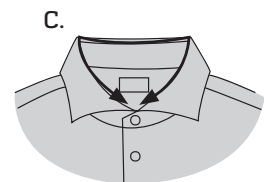

C. Collar, Length - Measure the collar circumference of your favourite shirt. Make sure to button the collar before you measure. See picture. Please note. Numbers in the Shirt Collar Chart is the measurement of the shirt, not your neck.

## Measurement Shirt Collar

Prices shown in catalogue are recommended retail prices (RRP) including local VAT. We reserve us from printing errors or changes of models and prices. Find all the latest information at [swedteam.com](http://swedteam.com)

All measurements in the guide are based on body measures. Swedteam PRO garments with a bit tighter fit, have small range of movement. Swedteam Classic garments with a wider fit, have big range of movement. Range of movement is always adapted in each style. Please note, this is only a recommendation. Fit and taste are always different from one person to another.
