

URE-SEAL H₂O

NEXT GEN

Ure-Seal Next Gen is the next generation of two-part, water-borne sealers. With a combined solids content of 56.5%, **Next Gen** boasts unmatched quality, performance, strength, color enhancement, and gloss value. Looking to give your surface an extra boost in luster? Then **Next Gen** is the product for you! **Next Gen** offers the brightest sheen to surfaces like no other sealer on the market. Its high chemical resistance and increased wet/dry film thickness make it perfect for interior and exterior use, as well as residential and commercial applications. You'll be amazed by the results of **Next Gen** whether the surface is stamped concrete, pavers, or water slides, the sky's the limit! For technical and safety data, please scan the QR code below.

STAMPED CONCRETE

CONCRETE SLIDES

GIVE SURFACES AN EXTRA COLOR BOOST WITH **URE-SHADES! (155)**

ICT Ure-Shades (155) is a 30 oz. concentrated, semi-transparent, liquid pigment additive designed to be used with Ure-Seal H2O Next Gen to seal, protect, and color any properly prepared concrete and concrete hardscapes surface.

Available in 14 Colors!

CLEANING PRODUCTS FOR USE WITH URE-SEAL H2O Next Gen

TOTAL QUICK STRIP S/R & M/L (780/770)

Total Quick Strip (S/R & M/L) is a professional high performance paint/coatings stripper. It is a non-hazardous, water based, ultra low V.O.C. stripper that can be used for interior and exterior applications. It comes in a sprayable (S/R) and multi-layer (M/L) blend.

TOTAL KLEAN (700)

Total Klean is a concentrated, all-purpose, user friendly cleaner and degreaser ideal for removing oil and grease stains along with other contaminants. Low odor & low VOC. Will rinse easily with water.

TOTAL PREP (720)

Total Prep is formulated to dissolve efflorescence and remove surface stains such as ground in dirt, traffic marks, iron stains, etc. It cleans and primes the surface evenly and enables sealers/protectors to penetrate and cover more efficiently.

TOTAL WASH (760)

ICT Total Wash is a specialty cleaner used to remove residue left behind by Ure-Seal H2O from sprayers, brushes, roller covers, and other equipment. It is safe to use on most commonly used pieces of equipment that may be used in the application of Ure-Seal H2O.
