

**STEP 3**

Select required height setting (low/medium/high) for both seat and kneepad

Insert bolts (F) through plastic cones (H) and central chassis frame (C)

Tighten handwheels (G)

Note the storage location of the allen-key (A).

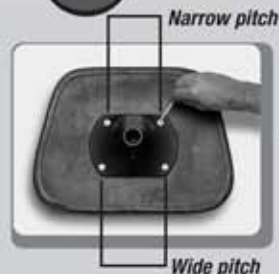

Easy to assemble...  
just follow these simple  
steps to complete  
seating comfort!

(See reverse for  
package contents)

**STEP 2**

Lower setting for persons  
up to 165cm tall.

Higher setting for persons  
taller than 165cm.

lower setting  
higher setting

lower setting  
higher setting

Fit plastic cones (H) to seatpad (E) and kneepad (D) as per illustration, using screws (I).

Plastic cones are uni-directional.

Narrow pitch/Wide pitch holes on plastic cone must align with corresponding holes on seat/kneepad.

**STEP 1**

Fit front and rear axle assemblies (B) to central chassis frame (C) using blue-tipped bolts (J) and included allen-key (A)
