

# ANGLE SIGHT 4"

Angle sight 4" Dual - Axis Inclinometer provides configurable pitch and roll measurements via an industrial grade, transfective monochrome display for superior visibility.

## Tough & Rugged

Designed with harsh industrial environments in mind, the display is encased in a rugged, weatherproof fascia, with an adjustable gimbal mount for optimum positioning for operators.

## Customisability

The integrated keypad allows for easy customisation of the display settings including warning and alarm setup, minimum and maximum tilt range and sensor customisation.

## Warnings & Alarms

Integrated Alarm and Warning Outputs provide a switched, low side signal. Both Warnings and Alarms can be configured to be normally on or normally off outputs.

## Password Protected

Password protection on the display menu can be configured by the user.
