

VORTEX Binocular Diamondback 10X42

Water proof - Dimension : 15cm x 14cm - Weight : 750 Grams - Field of View : 115m @ 1000m
 Multi purpose performer

Superior quality, high-performance hunting optics can find their way around your neck for a surprisingly affordable price. The smooth focusing 10x42 Diamondback binocular takes you to the fine details you prize.

Taking its lead from the Diamondback rattlesnake, this rugged binocular is striking in how well it detects life in low light. Huge field-of-view—the largest in its class—enhanced fully multi-coated optics, phase-corrected prisms, waterproof / fogproof construction, soft tapered eyecups, rugged rubber armor. It's all there in a Diamondback.

A rock-solid performer

Whether your adventure takes you across the Great Sandy Dessert, the rugged Pilbara terrain, the sub tropical Northern Australia into the spectacular Snowy Mountains. You can trust the performance of the Diamondback Binocular.

Argon gas purging

This advanced process protects your Diamondback binocular in the following ways:

- Argon gas does not absorb or react chemically with water.
- Argon gas eliminates internal fogging.
- Argon gas maintains its protective properties over a wider temperature range.
- Argon gas does not diffuse as quickly as other elements, extending the service life of the optics longer.

Optional
 Tripod Mount & Car Window Mount

The Vortex Diamondback binocular comes standard with rubber armoring, neck straps, form molded carry case, rain and dust shield, detachable flip-down style lens covers and a lifetime transferable warranty. This eyeglass wearer friendly piece makes an excellent travel size binocular while maintaining the performance benefits of a full size.
