### Common problem

1. The watch cannot be turned on  
Press the power key for more than 3 seconds or the battery power may be too low. Please charge it in time.
2. Bluetooth is not connected or cannot be connected  
1) Please try to restart the watch and re-link  
2) Please try to restart the Bluetooth of the mobile phone and connect again  
3) Do not connect other Bluetooth devices at the same time  
3 Hand measured heart rate/blood oxygen is not accurate  
1) Generally, the sensor of the watch is caused by poor contact with the human body.

- 2) Please pay attention when measuring the sensor is fully contact with the wrist
4. Insufficient sleep data  
1) Sleep monitoring is the state of self-conscious sleep and getting up, and needs to be worn correctly.  
2) When you fall asleep too late or wear it, you may have an error.  
3) Do not monitor sleep data during the day

For more common questions, please see the app [My> FAQ]

### Bluetooth data transmission

When connecting with mobile phones, the watch will synchronize some data with mobile phones in time through Bluetooth, including weather, notification messages, and sports health data. After the connection is disconnected or closed, these data will not be synchronized.

Notice:

- 1) Do not charge in a humid and water environment
- 2) Please clean the magnetic charging hole on the back of the watch on the back of the watch to ensure that the watch's magnetic suction charging hole is fitted with the magnetic suction charger to ensure normal charging
- 3) This product is not equipped with a power adapter. To ensure the safety of family and property. When charging, you can use a computer USB interface or select the power adapter with no output exceeding 5V... 1A. Please buy a power adapter through regular channels to prevent the use of bottom and fake power adapter to avoid causing burst or fire.

### Precautions

1. The measurement results of this product are only for the production examination. Please follow the doctor's guidance as any medical use and basis.
2. The waterproof level of this product is IP68, which cannot be used for deep diving and soaking in water for a long time. In addition, this product does not heat the water because the water vapor will affect the watch.
3. The right to modify the content of this manual without any notifications will not be notified separately. Some functions are different in the corresponding software version, which is normal.
