

Alka Bottle – Water Filter & Alkaliser

Turns ordinary water into
Filtered Alkaline Mineral Water
pH 9–9.5

Drinking alkaline water can help your body more effectively maintain acid-alkaline homeostasis without borrowing from valuable reserves. It will **supercharge your immune system, balance your body**, and deliver **optimal hydration.**

*Capacity: 550ml.

*Filter & Media materials: Negative Ion Ceramic balls, Activated carbon, Ion Exchange resin, Far-infrared beads, natural Bio-minerals

*Filter life: approx. 100 litres > 8 weeks for 1 user

*pH 9–9.5 **depending on water source*

*ORP: approx. -150 mV (negative Oxidation reduction potential)

*Antioxidants

*Small water molecule clusters for better hydration and detoxification

*Contains magnesium

*Adding Bio-minerals

*Soft tasting water

***BPA Free materials**

Alka Bottle – Manual

Step 1 Flush the Filter Cartridge

1. Unscrew the bottle and take the cartridge out of the foil bag.
2. Soak the filter cartridge in clean water for 5 minutes.
3. Shake the filter cartridge a few times then flush it with tap water.

Step 2 Install the Filter Cartridge

1. Unscrew the bottom cap of the bottle clockwise.
2. Install the flushed cartridge pressing it into the ring of bottom cap.
3. Ensure that the O-ring seal is sitting correctly in the groove!
Tighten bottom lid firmly. Otherwise the bottle may leak from the bottom
4. Screw the bottle to the bottom cap.

Step 3 Clean the Alka Bottle

1. Unscrew the top cap and fill it with potable water, close the lid.
2. Shake the bottle several times and then discard the water.

Alka Bottle – Water Filter & Alkaliser

Step 4 How to Program the Filter Life Indicator (see bottom of the bottle)

1. The numbers 1-12 stand for the 12 months of the year and the 4 scales in each month stand for 4 weeks.

2. Rotate the small triangle to the current month and week.

3. Each filter serves 1 persons drinking water supply for approx. 2 months (equals approx. 100 litres).

4. Reset the date when changing the filter.

Step 5 Fill water into the bottle

Fill it only with clean and safe water.

(The Alka Bottle reduces chlorine and chemicals but not bacteria, ecoli, giardia or chloramine)

Important – Use the alkaline water within 12-24 hours as it may otherwise gain a strong saturation of the alkaline media and the taste may be strong.

_Do not use hot water or put into a dishwasher.

-Clean the bottle with warm water and mild detergent or vinegar. Remove cartridge before cleaning

Trouble shooting – In case the bottle is leaking, make sure the silicone seal is aligned correctly in the bottom groove. Tighten the bottle onto the filter base firmly

Alka Bottle – Water Filter & Alkaliser

Step 6 Shake the bottle 5-7 times and wait a few minutes for it to do it's magic ...

This allows the water to be immersed in the magnesium-rich, Mineral -rich and activated carbon-rich media to purify the water and infuse it with minerals – making it alkaline.

Step 7 The bottle is now ready to use

Enjoy the Alkaline Mineral Water

Important:

- Use the alkaline water within approx. 12-24 hours as it may otherwise gain a strong saturation of the alkaline media and the taste may be strong.
- Do not use hot water or put into dishwater (this could damage the bottle)
- Clean the bottle with warm water & mild detergent or vinegar. Remove cartridge before cleaning

Troubleshooting: In case the bottle is leaking, make sure that the silicone seal is aligned correctly in the bottom groove. Tighten the bottle onto the filter base firmly.
