

# THE POWER GRIPZ

Gripping the industry since the launch in 2013

As the first choice in grip solutions, The Power Gripz has been embraced by end users in various industries, although originally designed by LINEMEN—for LINEMEN. The unique day-to-day work challenges of utility workers demanded a new approach to safety, durability, and comfort.

Existing leather protectors didn't provide the grip needed to accomplish tasks quickly and effectively. Consulting with linemen allowed to the company to develop The Power Gripz as the solution for the workers to grab and keep a grip on tools for safer worksite drop zones and work in any weather condition. The Power Gripz proprietary grip pad on the fingers and palm were quickly identified as potential solutions for other industries as well: oil and gas, construction, mining, steel, and arborists to name a few. All industries needed and depend on ultimate protection, maximum comfort, and enhanced safety. The Power Gripz delivers that protection.

## COMPLETE LINE OF WORK GLOVES

In addition to its high-quality, all-leather protectors, The Power Gripz offers a complete line of work gloves from a basic unlined version to a comfortable Thinsulate and Kevlar lined A4 cut resistant glove. The Power Gripz includes options to meet the demands and challenges of any environment. Fire, water, and cut resistant allow safe working conditions in harsh and dangerous conditions. All Power Gripz leather protectors and leather work gloves are 40cal/CM2 and its Kevlar-lined styles meet the ANSI/ISEA 105-2016 A4 level; every style is stitched with Kevlar thread for strength. Added to The Power Gripz offering, by popular request, is a complete line of mechanic style work gloves, fast becoming a go-to choice.

## MOVING FORWARD

The Power Gripz announces the following changes and updates for 2018: moving into a larger facility in the Cleveland Ohio area that will allow for the continued

growth and our customer service, sales, warehousing, and research and development divisions; continued innovation in The Power Gripz styles and offerings will continue to be on going; new product additions to the portfolio of The Power Gripz products to include a low-cost ground glove and synthetic knit version, as well as an all-purpose driver style glove and climber, all using the proprietary finger and palm grips.

The Power Gripz strives to give the end user increased confidence on the job, enhanced safety, and maximum production. There is a Power Gripz Protector and Work Glove that is a perfect fit for most every individual taste and we will continue to review feedback from our esteemed and respected end users in the industry to keep them safe and satisfied. This is our goal and more importantly, our promise to our very valued customers.
