Also distributed in Australia and the U.K.

Our Distributor Network is Growing...

The Power Gripz LLC, is always looking to increase our distributor network to best serve you, please contact us to find a distributor in your area or to place an order.

CONTACT OUR OFFICE FOR A POWER GRIPZ DISTRIBUTOR IN YOUR AREA:

Toll-Free: 877-271-0444 or 216-455-1101 E.S.T
(outside the Continental USA)

FAX: 216-455-1102 Or visit www.thepowergripz.com

CREDIT CARDS: Major credit cards accepted

(MAP) Distributor Program available

SHIPPING METHODS: USPS, UPS or shipper of your choice
Orders ship from Cleveland, OH Monday-Friday

WARRANTY INFORMATION: The Power Gripz is warranted to be free from defects in materials and workmanship, and to meet the requirements of current ASTM standards at time of shipment. Our only obligation will be, at our option, to replace any portion proving defective or to refund the purchase price thereof. The buyer assumes all other risk, if any, such as the risk of any direct, indirect or consequential loss or damage arising out of the use of, or inability to use, these products.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR PARTICULAR PURPOSE AND ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, AND MAY NOT BE VARIED OR EXTENDED EXCEPT IN WRITING BY AN AUTHORIZED OFFICIAL OF THE POWER GRIPZ.

The Power Gripz gloves are intended for use with Class Rated Rubber Insulated Gloves and offer no protection against low or high voltage on their own.

*It's time to change your gloves, **FOREVER.***

SAFETY

Designed by Linemen. Proven by Science.

Ultimately linemen know keeping the power on is all in their hands. But ordinary gloves just weren't designed for the real world, in-the-air work they do every day. Ordinary leather protector gloves get slick from wear and the oily residues on line apparatus; maddeningly slippery in foul weather. Linemen need and deserve a better grip on the tools, small parts and apparatus they use, to work more efficiently, keep drop zones safer and get the job done, no matter what conditions the linemen face.

That's why the same team of professional linemen who identified the inadequacies of old fashioned leather protector gloves, helped design, test and perfect The Power Gripz.

The only gloves designed by linemen, for linemen. The only gloves tested and proven to be superior for grip, arc protection, heat penetration and all-weather dexterity. The Power Gripz have been endorsed by Hugh Hoagland, founder and senior consultant to ArcWear.

- The highest leather protector glove ATPV rating in the industry: 40cal/CM2.
- Blocks fully 94% of heat penetration in EBT testing.
- Meets and/or exceeds all ASTM F-696 Standards for leather protector glove design.
- Proprietary grip pads (patent pending) provide unparalleled grip without compromising hand dexterity, and safety in all weather conditions.

ATPV rating: 40cal/CM2

Incident Energy (cal/cm²)
Arc Thermal Performance Value (ATPV): Value is presented in calories per square centimeter represents the maximum capability for arc flash protection for a particular arc flash clothing.

HAF rating: 94%

Incident Energy (cal/cm²)
Heat Attenuation Factor (HAF): Denotes percentage of heat blocked by the fabric.

Tested by the Best

Kinetrics is the category leader in providing life cycle management solutions for the electricity industry. Trusted by clients world-wide, Kinetrics expertise in testing, inspection and certification is backed by 100 years of experience in addressing the North American Utility Industry's most challenging technical issues.

Endorsed by the Best

"The Power Gripz could begin to change the utility industry by giving better grip than leather with even better arc protection. Linemen have complained about the poor grip of leather, especially when damp. The Power Gripz could solve these problems without compromising protection."
- Hugh Hoagland

ArcWear was founded in 2002 as a world-class Arc flash testing facility for protective apparel for manufacturers across the globe. They are the most experienced and trusted company in Arc testing with a worldwide reputation for reporting accurate and informative results.

PATENT PENDING

DESIGN

Ultimate Protection. Maximum Comfort.

Proprietary Scientifically Blended Silicone ribbed fingertip grip pads provide unmatched tactile control of small parts.

Patent pending grip material extends across palms for secure grip on tool handles and gear.

Kevlar stitching with flame retardant quality on all seams for extreme durability, strength and maximum thread count allowed by industry standards.

Reverse rolled cowhide cuff improves safety in an arc fault situation

Specialized cowhide provides arc and heat protection plus superior abrasion resistance while providing all day comfort and dexterity.

100% compliant, meets & exceeds all ASTM F-696 leather protector glove standards.
ATPV rating: 40cal/CM2

Velcro adjustment strap provides easy on and off.

Non-conducting ring replaces clumsy buckle adjustment while limiting arc flash burns from metal buckles.

the **LINEMAN**

our **PRODUCTS**

Designed by linemen, for linemen.

They were looking for a better glove. They ended up creating the best glove ever made.

It was a day like any other... just a few veteran linemen swapping stories.

The ranks of professional linemen know the risks of working aloft in all weather, and know their equipment and safety procedures are designed to keep them safe. But, on this particular day, they realized everyone had a shared concern; their existing leather gloves create a sense of insecurity because they just don't provide the grip they need along with the high voltage safety. That got them to thinking; there has to be a glove out there that provides better control on the job, more help with the grip.

Except there wasn't.

So those linemen set out to design a glove that would deliver the safety, grip and control they needed. While researching, testing and perfecting this new design of linemen leather protector gloves, they created the solution for personal safety, efficiency and effectiveness on the job.

They created The Power Gripz.

Leather Protector Gloves & Mittens For use with Class 1-4 Rubber Insulated Gloves.
