RAIN SCREEN STRIPS

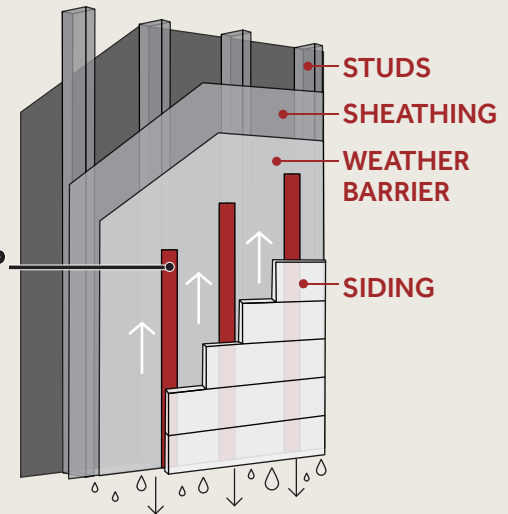

STABLE, EFFICIENT, COST EFFECTIVE AND ENVIRONMENTALLY FRIENDLY ENGINEERED WOOD RAIN SCREEN

What is Greenstrip?

A borate treated engineered wood furring strip that meets rain screen code mandates.

- Dimensionally stable
- Excellent fastening base
- Environmentally friendly
- More cost effective than composite materials
- Treated protection against fungal decay and insect manifestation

GREENSTRIP
FURRING

Why?

Greenstrip is an efficient and environmentally friendly choice for weather shielded above ground applications. It is pressure impregnated with preservative which increases protection against fungal decay and insect manifestation extending the life of the product making it a more cost effective solution than composite type materials. The Borates used are a safe and green choice for building projects. The EPA registered pesticides borates are approved for use where human contact occurs.

Installation

Greenstrip treated with the DOT type of borates has been found to be no more corrosive than traditional CCA treated wood. Code compliant hardware is adequate. The use of non-galvanized hardware of sizes and types approved by model code are acceptable when attaching Greenstrip to studs and other framing members. The completed rainscreen should remain dry in service and be protected from weather and water. If in doubt regarding fastener selection, the manufacturer should be consulted.

Handling

Greenstrip at the job site should be stored dry off the ground and protected from the weather. Normal short term exposure to the weather during installation does not affect the performance of Greenstrip treated with Borate. The borates used do not contain volatile organic compounds so air quality is not affected by the preservative.

SPECIFICATIONS

Greenstrip available in sizing for installation of $\frac{3}{8}$ ", $\frac{1}{2}$ ", & $\frac{3}{4}$ " air gaps. Thicker dimensions are available on a special order basis.

PACKAGED PER THE FOLLOWING:

- 24 strips per bundle
- 24 bundles per pallet
- 44 units per full truckload

GREENSTRIP – SillBor® Borate Pressure-Treated Wood is backed by a lifetime limited warranty against damage from termites and fungal decay through Arch Wood Protection, Inc., a Lonza Company. To view full warranty please visit: <http://www.sillbor.com/warranty/limited-warranty.aspx>
