

STEALTH

A close-up photograph of a gecko with mottled brown and grey skin, perfectly camouflaged against a tree branch. The gecko is positioned horizontally, with its head to the right. Large, vibrant green leaves with water droplets are in the foreground and background, creating a lush, natural setting. The word 'STEALTH' is overlaid in large, white, sans-serif capital letters at the top left of the image.

STEALTH: a covert operation by Estelle to design, patent and manufacture a modern, industry-first hardware series that conceals all visible fixing screws, inside and out. Mission accomplished!

ESTELLE
PREMIUM FRAMELESS GLASS SOLUTIONS

IT'S WHAT YOU CAN'T SEE

Prior to STEALTH, Soap, shampoo and body fats would get trapped in the screw heads and countersunk cavities of traditional hinges and brackets. Keeping them clean and hygienic was difficult and required accessing the tiny spaces with a toothbrush or similar to remove debris.

With many years of expertise and in-house computer aided design supported by a research and development team, Estelle® has always set the pace in ingenuity, function, styling and aesthetics. We imagined 'outside the square' and came up with a revolutionary solution.

The STEALTH Series from Estelle® feature a smooth, clean slide-over surface which hides and protects the internal parts.

STEALTH Hinge and bracket covers – available across the Boston, Aspen and Romano ranges – immediately improved the hygiene of bathrooms and made cleaning a quick and simple wipe over.

STEALTH adds stunning luxury to frameless shower screens and only Estelle® can offer such unrivalled aesthetics.

Mission accomplished!

Cover image: Chameleons are a distinctive and highly specialised clade of Old World lizards with 202 species. These species come in a range of colours, and many species have the ability to Stealth by changing colour.
