

# QUICK START GUIDE

Before using your new *Ice Cream Depot Frozen Dessert and Beverage Maker, the SX1000*, please visit our website:

[www.icecreamdepot.com](http://www.icecreamdepot.com)

Register your machine for monthly drawings to win 2 boxes (20pack) of ICD complimentary powders.

Go through the videos to become familiar with assembling and disassembling of the various assemblies.

Download the Care and Use Instructions and keep for future reference.

## LUBRICATION RECOMMENDATION

The Auger and Dispense Head Assembly have rubber seals to prevent leaking. It will be recommended to apply some Margarine onto the rubber seal surfaces to avoid them from running dry and reduces the life of the seals.

## SANITIZATION

If preparing ice cream or milkshake mixes using dairy products, it is recommended to sanitize the Dispense Head Assembly / Auger periodically after cleaning to avoid Bacteria Growth by following the instructions found on normal kitchen sanitizers for coffee pots, etc.
