

## 2 In 1 Double Rack System

### Double the capacity of your dishwasher - halve the cost of your wash cycles!

The top rack can accommodate plates with a diameter of 250mm and the bottom rack has capacity for cups and small bowls up to 110mm in height.

By washing two racks in one you are halving the cost of each cycle: reducing energy, water, and chemical consumption by up to 50% - without compromising results!

Simply remove the insert when you need to wash larger items and regain the full 425mm loading height of the wash chamber.

Available as an optional extra for undercounter dishwashers from the following ranges:

- Ecomax Plus – F515W / F515SW
- Profi – FX
- Premax – FP
