# Sample STNR Jack Herer D8 + THC-P Disposable Vape Pen - 2mL N02270

Sample ID SD221115-070 (54988)		Matrix Concentrate (Inhalable Cannabis Good)
Tested for Nectris		
Sampled -	Received Nov 14, 2022	Reported Nov 16, 2022
Analyses executed CANX		Unit Mass (g) 2.0

Laboratory note: The estimated concentration of the unknown peak in the sample is 97.55 mg/g | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)48-THC or d9-THC. At this time there are no reference standards available for (+)48-THC is a different compound from the main (+)48-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)48-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is estimated to be 867.32 mg/g.

# Sample STNR Purple Punch D8 + THC-P Disposable Vape Pen - 2mL N02272

Sample ID SD221115-068 (54986)		Matrix Concentrate (Inhalable Cannabis Good)
Tested for Nectris		
Sampled -	Received Nov 14, 2022	Reported Nov 16, 2022
Analyses executed CANX		Unit Mass (g) 2.0

Laboratory note: The estimated concentration of the unknown peak in the sample is 98.60 mg/g | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)48-THC or d9-THC. At this time there are no reference standards available for (+)48-THC (s) different compound from the main (+)48-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques ovariable, the separation of (+)48-THC and d9-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total d8-THC is estimated to be 870.81 mg/g.

# Sample STNR - THCP Tropic Thunder Disposable 2mL

Sample ID SD230315-009 (69040)		Matrix Concentrate (Inhalable	Cannabis Good)	
Tested for STNR CREATIONS				
Sampled -	Received Mar 14, 2023		Reported Mar 15, 2023	
Analyses executed CANX		Unit Volume (mL) 2.0	Density (g/mL) 1.0	

Laboratory note: The estimated concentration of the unknown peak in the sample is 6.75% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC is o different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be 8:248%

# sample STNR - THCP Mimosa Disposable 2mL

Sample ID <b>SD230315-007 (69038)</b>	Matrix Concentrate (Inhalable Cannabis Good)				
Tested for STNR CREATIONS					
Sampled -	Received Mar 14, 2023	Reported Mar 15, 2023			
Analyses executed CANX		Unit Volume (mL) 2.0	Density (g/mL)	1.0	

Laboratory note: The estimated concentration of the unknown peak in the sample is 6.64% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC is o different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) BC Concentration is estimated to be: 8149%
